**3. Work Session to Discuss Criteria for the Following Application for a Zoning Map Change Actions:**

***Opened Work Session at 6.02 pm***

Community Development Director Carmen Howard started the discussion with an overview of the PAD process and how it works. She explained the Commission will be considering a re-zoning action tonight which will include a supporting Concept Plan. The next steps in the PAD process after rezoning is to review the Site Plan for the actual planned development. She went on to explain how the zoning code works with development. She explained that a PAD allows the developer to be more creative with their plan.

Commissioner Blue supports the PAD process. He stated that RV Park applicants in the past had difficulty getting financing for the use when the approval was with a Use Permit. He stated a lender will not lend on a Use Permit.

Ms. Howard explained the difference between a Use Permit vs. a PAD. With a PAD, the applicant has to have a Site Plan approved, that spells out what the development will be. If there are major changes to the design, the applicant has to come back in with a revised Site Plan.

Commissioner Norton asked Ms. Howard if she worked with cluster developments in Prescott Valley, using a PAD; he was curious about Open Spaces and reducing lot sizes. Ms. Howard stated there weren't any that came in while she was there, but she said it is the tool of a PAD -- to bring development closer together and leave more open space.

Commissioner George stated there are some cluster developments in Flagstaff, and aren't there some incentives to the developer? Ms. Howard stated the developer could get breaks with infrastructure and fees; and that can also be accomplished with individual Development Agreements. Camp Verde does not have any cluster developments here yet.

Chairman Davis asked if the underlying zoning stays when a PAD is applied? Ms. Howard stated it depends; if the zoning fits the project then you can leave it. He stated the zoning is changing for this project, does this allow RV Parks without a Use Permit? Ms. Howard explained that all zoning districts must have one or the other for an RV Park. He asked if the underlying zoning just stays if the project does not get completed. Ms. Howard explained that there could be verbiage that states it will revert back to the original zoning if a project takes too long to come to fruition.

Chairman Davis asked if a PAD have separate set of guidelines. Ms. Howard stated it has some guidelines; there was discussion regarding PADs requiring Open Space, eliminating the need for units per acre, and flexibility in setbacks, which would be approved on the site plan and affected by building and fire code separations.

Chairman Davis asked about the cost. Ms. Howard said PAD (rezoning) and a Use Permit are both \$1,800, but a PAD Final Site Plan Review is an additional \$500. He asked, other than flexibility, what are other advantages of

going with a PAD? Ms. Howard stated that it allows phasing and it is a hard zoning and held to a site plan. There are certain requirements. Once approved, the use is granted.

Chairman Davis asked if they did not do PAD with this project would they would be bound to the setbacks that are already set for each parcel? Ms. Howard said they would be asked to combine the all of parcels. He stated he is a fan of PADs.

Commissioner Vanlandingham asked if in the past this would have been a Use Permit not a PAD? Ms. Howard explained it would have been a Use Permit and would have been something that could have been be taken away; this makes projects hard to finance. Chairman Davis added Use Permits are granted for a limited time and the applicants are required to come back and renew the permit. Commissioner Vanlandingham asked if it is the Town's desire to get rid of Use Permits? Ms. Howard stated no -- there are certain instances where they are appropriate to use.

**Actions:**

**Public Hearing Declared Open at 6:32 pm**

**Call for Staff Presentation:**

Town Planner Melinda Lee stated the applicant was not able to be at the meeting tonight, but the applicant's agent was present. She pointed out a discrepancy in the staff report relating to the number of proposed RV The applicant was in escrow on an adjacent seven-acre parcel, which increased the total number of spaces from 300+ to 400+ and required changes to the applicants application, the Staff report and hearing date The property is located near the intersection of Interstate 17 and State Route 260. The proposed C2 District is a better transitional use for the property, with the mix of commercial and residential zones in the area. Ms. Lee reviewed the amenities that are planned for the park the benefits for the community:

- Proposed frontage road connecting the roundabout and Dickison Circle, for access to State Route 260.
- Trails and picnic areas are proposed along the river for open space and recreation.
- A new Town park is across the river and may receive some property from the project.

- The Town is going to put in a sewer lift station and the property owner is granting an easement.
- Proposed pond/lake may be used by the fire department.

Chairman Davis asked about the Flood Plain. Ms. Lee explained that RV Parks are a good use of flood plain property because if there is a flood, RV's can be moved out of area. She pointed out a section of the plan that may be turned into a pond/lake, which would be useful for firefighting. Commissioner Norton noted this area would be either be a lake or spaces.

Ms. Lee pointed out the current Town Ordinance states RV spaces must be 1500 Sq. Ft and a PAD allows the developer to propose spaces that accommodate the different sizes of RV's and that many of the proposed spaces are larger than what is required by the Zoning Ordinance .

Staff believes this is a good use for the property and expects it to be a high-end RV park.

Commissioner VanLandingham asked how they determined the trade value for the Town park proposal. Ms. Howard stated this will be done with an appraisal.

**Call for Applicant Presentation:**

Krishan Ginige, SEC (Southwest Environmental Consultants) introduced himself to the Commission.

Commissioner Vanlandingham asked if the developer has owned similar projects before. Mr. Ginige stated the developer has several RV Park properties in different stages of completion. There is one in Sun City, AZ and the CA/AZ border. Mr. Ginige doesn't have all the information about the appraisal with him tonight but can bring back the information.

Chairman Davis asked who attended the neighborhood meeting. It was confirmed that there were two people from the public at the neighborhood meeting, Mr. Ed Erck and Mr. Andy Groseta.

Chairman Davis asked why the applicant was proposing a pond, it doesn't economically make sense. Mr. Ginige explained that it is to preserve their irrigation water rights -- this is one way of securing it and they don't want to lose it. Commissioner Norton stated that a Water Attorney needs to be involved to make sure they don't jeopardize their water rights.

Chairman Davis stated that landscaping is critical and asked what is intended for the property. Mr. Ginige reviewed the amenities that are planned for the development. Chairman Davis stated that with the river access, is a great opportunity to make a high-end RV Park.

Commissioner Norton stated that an RV recreation master plan-property will help the property values along river. Mr. Ginige agreed that it is a beautiful property.
