BUILDING PERMIT APPLICATION

Residential Remodel/Addition

In order to process a residential remodel/addition permit application, the following must be submitted:

(Please place a check mark in each box to verify completion of each item **if not completed permit application will not be accepted**)

- Application – first page completed (valuation, square footage, description, etc.)
- Site plan **to scale** – 8 ½ x 11 size paper – showing:
 - Assessor's parcel number
 - Indicate scale (may be engineer or architect's scale)
 - Address
 - Signature of owner/authorized agent with a date
 - Parcel diagram (lines)
 - Dimensions of property
 - Show dimension and setbacks on all sides of home to property lines
 - Adjacent streets and alleys
 - Location and dimensions of easements that apply
 - Indicate front of property
 - Indicate north
 - Ingress/Egress driveway location
 - Location of septic tank and leach line (include dimensions, size and setback or distance from proposed home)
 - Location of propane tanks
 - Indicate existing topographical contours (solid line) and proposed contours (dashed line)**
 - Indicate any required cut and fills and amounts of each
 - Location of any terrain features that affect placements including washes, creeks or ditches within 20 feet of the building site
- Completed lighting permit and lumen calculation form for all outdoor lighting, existing and new
- Soils Classification by Geotechnical Engineer.
Note: When required by the Building Official, a Soils Investigation Report shall be submitted if soils classification proves soil conditions necessitate such report.
- Water & Sanitary form
- Contractor Information form
- 2 sets Truss design drawings (with consideration for roof mounted equipment), if applicable

- Two sets of plans (Drawn to scale)**

- Includes above referenced site plan
- Floor plan with rooms labeled
- Elevations (all four)(labeled) show finish grades
- Foundation plan include section of footing and foundation
- Cut section of house detailing framing
- Roof framing plan
- Floor framing plan if applicable
- Electrical plan
- Mechanical plan
- Plumbing plan
- Deposit based on customer valuation

Note: Development Fees, where applicable, will be collected upon issuance of permit.

**AN INCOMPLETE APPLICATION WILL CAUSE YOUR
PERMIT TO BE DELAYED**

Dear Building Official:

This is to let you know that we are in the process of mailing annual certificates to construction contractors for purposes of compliance with **ARS § 42-5007**. This law requires that building authorities obtain a certificate from the Department of Revenue to ensure that the bonding requirement has been met prior to the issuance of any building permit for projects of \$50,000 or more in value. All qualified contractors should receive their certificate by July 31, the expiration date of the last certificates.

There are three versions of certificates that represent compliance with the bond requirement: An annual certificate issued by the Department of Revenue; a one-time exemption; and a receipt for a bond for the actual project. Please note that the one-time exemption and receipt for bond must specify the location of the project site. Examples of the different types of certificates are enclosed for reference, along with the guidelines for compliance with this law.

For any questions regarding these procedures or assistance to contractors, please contact the Bond Compliance Officers at (602) 716-6056.

Sincerely,

A handwritten signature in cursive script that reads "Tom Waters".

Tom Waters
Administrator
License & Registration

32-1169. Local proof of valid license; violation; penalty

A. Each county, city or other political subdivision or authority of this state or any agency, department, board or commission of this state which requires the issuance of a building permit as a condition precedent to the construction, alteration, improvement, demolition or repair of a building, structure or other improvement to real property for which a license is required under this chapter, as part of the application procedures which it utilizes, shall require that each applicant for a building permit file a signed statement that the applicant is currently licensed under the provisions of this chapter with the applicant's license number and the applicant's privilege license number required pursuant to section 42-5005. If the applicant purports to be exempt from the licensing requirements of this chapter, the statement shall contain the basis of the asserted exemption and the name and license number of any general, mechanical, electrical or plumbing contractor who will be employed on the work. The local issuing authority may require from the applicant a statement signed by the registrar to verify any purported exemption.

B. The filing of an application containing false or incorrect information concerning an applicant's contractor's license or transaction privilege license with the intent to avoid the licensing requirements of this chapter is unsworn falsification pursuant to section 13-2704.

I am currently a licensed contractor: Name _____

License No. ROC _____ License Class _____

Signature _____ Title: _____

EXEMPTION FROM LICENSING

I am exempt from Arizona contractors' license laws on the basis of the license exemptions contained in A.R.S. §32-1121A, namely:

- A.R.S. §32-1121A.5 – I am the owner/builder of the property and the property will not be sold or rented for at least one year after completion of this project.
- A.R.S. §32-1121A.6 – I am the owner/developer of this property and I will contract with a licensed general contractor to provide all construction services. All contractors' names and license numbers will be included in all sales documents.
- Other - _____
(Please specify)

I understand that the exemption provided by A.R.S. §32-1121A.14 (the Handyman Exemption) does not apply to any construction project which requires a building permit and/or the total cost of materials and labor are \$1000 or more.

I will be using the following licensed contractors on this project:

_____ License No. ROC _____ Class _____
(General Contractor)

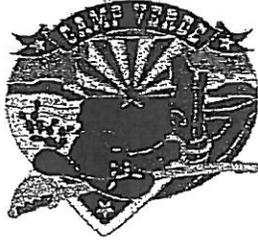

_____ License No. ROC _____ Class _____
(Mechanical Contractor)

_____ License No. ROC _____ Class _____
(Electrical Contractor)

_____ License No. ROC _____ Class _____
(Plumbing Contractor)

SIGNATURE _____ DATE _____

Falsification of information on this document for the purpose of evading State licensing laws is a Class II misdemeanor pursuant to A.R.S. §13-2704.

Attention Building Permit Applicant:

The Town of Camp Verde Building Department is now requiring that a lumen calculation sheet be submitted with all permits for new construction for both residential and commercial development. To help you understand the information needed to fill out the form, we have included with your building permit application a graphic illustration of the differences between shielded and unshielded light fixtures and a lumens calc sheet of different types of light bulbs. You must use the maximum size bulb allowed by the manufacture of the lamp to figure your lumens. This will be found on the lamp itself or on the packing material.

Unless you are a part of a development project (for an example: a developed subdivision or master planned community) you are allowed at least 5500 unshielded lumens or 100,000 total lumens for your project even if your lot size is under an acre.

For more information on our lighting ordinance you may visit our website at www.cvaz.org and click on the Planning and Zoning Ordinance and go to Section 120 or call our office at (928) 567-8514 and staff will answer any of your questions.

Please help us protect our dark skies and rural lifestyle.

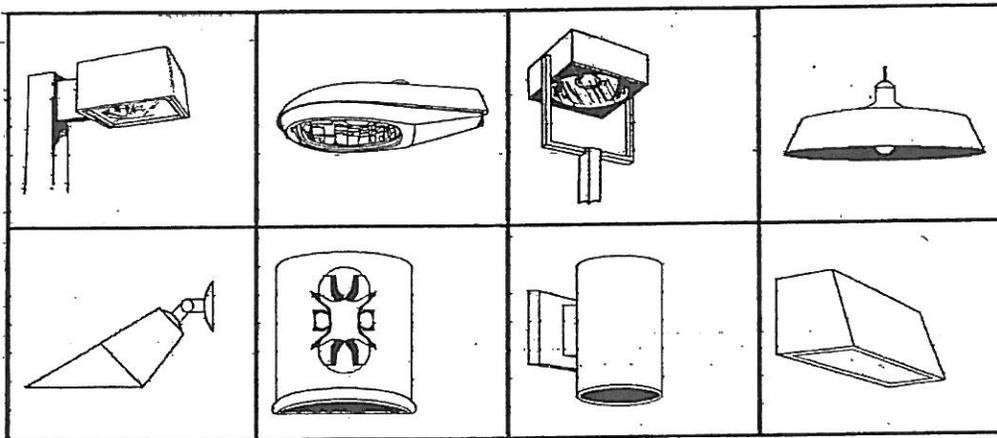

The Community Development Department
Town of Camp Verde, Arizona

O. Addendums/Additional Information:

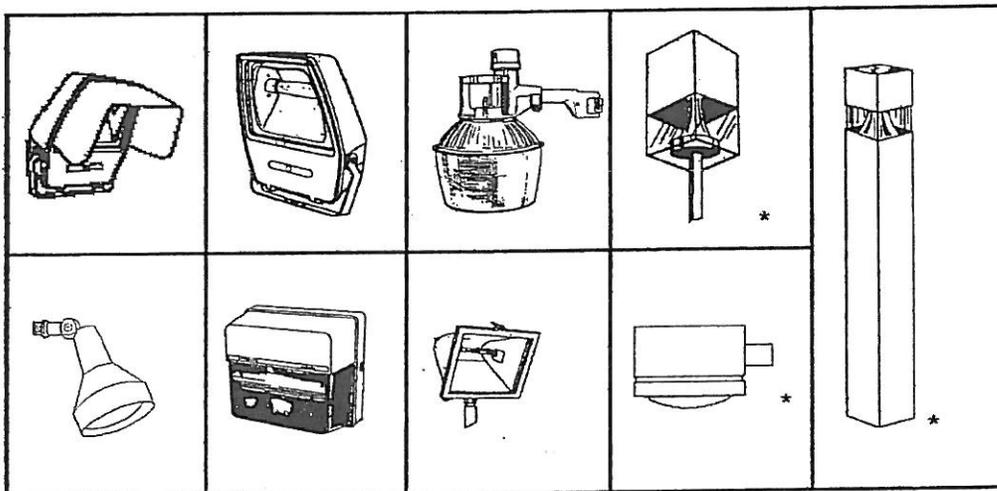

1. Shielding:

A practical working way to determine if a fixture or tube is fully shielded: if the lamp or tube, any reflective surface, or lens cover (clear or prismatic) is visible when viewed from above or directly from the side, or from any angle around the fixture or tube, the fixture or tube is *not* fully shielded.

Examples of fixtures that are Fully Shielded (Note: to be fully shielded these fixtures must be closed on top and mounted such that the bottom opening is horizontal):

Examples of fixtures that are NOT Fully Shielded:

* Note: even though the lamp in these fixtures is shielded from direct view when viewed from the side or above, reflective surfaces and/or lens covers are directly visible from the side.

Note for luminous (neon) tubes: when such lighting is installed under or behind a roof overhang, if the roof-line or eave is not horizontal the tubing may be visible from above when viewed from the side and therefore be unshielded.

2. Typical Lumen Outputs and Energy Costs for Outdoor Lighting

Per year costs based on 4000 hours operation (all night every night) and \$0.10/kwh energy cost. Power costs are for lamps only; they do not include ballast losses used with HID lamps (LPS, HPS, MH and fluorescent). Ballast losses have typically been somewhat larger for LPS lamps than for other types, though not enough to offset the increased luminous efficiencies of these lamps. This effect has been decreasing with the newer ballasts.

Lamp Type	Lumen Output (Initial)	Power Cost (Per Year)	Cost per 100 Lumens (Per Year)
-----------	---------------------------	--------------------------	-----------------------------------

Low Pressure Sodium (LPS):

18 Watt	1800	\$7.20	\$0.40
35 Watt	4800	\$14.00	\$0.29
55 Watt	8000	\$22.00	\$0.28
90 Watt	13500	\$36.00	\$0.27
135 Watt	22500	\$54.00	\$0.24
180 Watt	33000	\$72.00	\$0.22
