Camp Verde Ballot Initiative # 401 Support Statement

We support this initiative because: Although pleasant, the current library has outgrown its facility. Built in 1975, it has served the community well, but needs have changed and so must the facility and service to its patrons. The library will effectively provide computer and other media opportunities to patrons of a modern facility. The children of any community must have its adults invest in their future. Likewise, construction of the park infrastructure and ball fields certainly demonstrates a community which continues to value its youth. Volunteerism is woven into the historical fabric and life of Camp Verde and with new facilities, additional volunteers will serve many more children in sports, as well as other activities which might be organized and scheduled. As volunteers and organizations have continued to undertake projects deemed worthy by the community, there becomes a reason and place for private donations. They assist the Town Government as it takes its rightful place to ensure a project is correctly completed with quality and confidence. A former teacher has left a legacy gift to the town for the construction of a new library. There have been additional gifts, fundraisers, and donations as well. Local government support and action, expresses to private citizens they may have confidence in fundraising, donations, and legacy gifts knowing the funds will not be squandered, lost, or misused. The community will benefit from such gifts, donations, and legacy gifts. The time is here to vote for a means by which these two community projects may be built. The time has come for our community to say "YES" to the current and future investment in our own community. We must again demonstrate to all, present and future, Camp Verde is more than a place...it is a caring community of people investing in its own future.
