All owners shall be responsible for any and all applicable impoundment and boarding fees in connection therewith.

- D. A violation of any provision of this Article is punishable by a fine of up to two thousand five hundred dollars (\$2,500), six months in jail, three years' probation or any combination thereof. The magistrate may not grant probation in lieu of, or otherwise suspend, the imposition of the minimum fine prescribed.
- E. In addition to the above sanctions, upon the declaration of an animal as vicious or destructive, the magistrate shall order the owner to do one or more of the following:
 1. The animal shall be kept in an enclosure that is high enough so that the animal cannot bite, harm, or injure anyone outside the enclosure. - A. A dangerous animal means one which has been declared to be vicious or destructive pursuant to this Article or displays or has a tendency, disposition, or propensity, as determined by the Town enforcement agent, to:
1. Injure, bite, attack, chase, or charge, or attempt to injure, bite, attack, chase, or charge a person or domestic animal in a threatening manner; or
 2. Bare its teeth or approach a person or domestic animal in a threatening manner.
- B. A dangerous animal does not include an animal used in law enforcement, nor does this Article apply to animals in custody of zoos or wild animal parks, animals placed in animal shelters, animals under the care of veterinarians, or wild animals.

Section 6-2-4 Declaring an Animal Dangerous; notice

- A. Camp Verde Animal Control shall develop guidelines to determine if an animal is a dangerous animal.
- B. Whenever an animal control officer has reason to believe an animal may be dangerous, an evaluation of the animal shall be conducted.
- C. If Camp Verde Animal Control declares that an animal is dangerous, the owner shall be notified and issued an order of compliance. Once an animal is declared dangerous, the animal is dangerous until a hearing officer or judge determines otherwise. If the owner is known, the owner shall be provided with a written notice of the owner's right to file, within five days of receipt of the notice, a written request with animal control for a hearing to determine if the animal is dangerous. If the owner's whereabouts cannot be determined or the animal poses a threat to public safety or domestic animals, the animal shall be impounded and notice (including notice that the animal could be destroyed if the owner fails to appear at the hearing) shall be posted on the owner's property or mailed forthwith to the owner at the owner's last known address by registered or certified mail, return receipt requested.

Section 6-2-5 Hearing; burden of proof; appeal

- A. The owner of the animal may request a hearing to contest the declaration of dangerousness or contest the confinement conditions ordered by animal control.
- B. If the owner of an impounded animal fails to appear at a hearing or fails to request a hearing, the animal shall be forfeited to animal control to be humanely destroyed.
- C. If the owner of a non-impounded animal fails to appear at a hearing or fails to request a hearing, the animal is declared to be dangerous and the order of compliance shall remain in effect.

- D. After request for a hearing, Animal Control shall set a hearing date within five working days at a time and place designated by the animal control officer or Town enforcement agent. The hearing shall be conducted by a hearing officer selected by Animal Control.
- E. The hearing shall be held in an informal manner and a record thereof shall be made by stenographic transcription or by electronic tape recording. The rules of evidence do not apply, and hearsay is admissible.
- F. It is the burden of the owner of the animal to establish by a preponderance of the evidence that the animal is not dangerous. The owner may be represented by counsel and present witnesses at the owner's cost.
- G. The hearing officer shall make a written decision within five working days of the hearing and notify the owner of the animal of the decision.
- H. If the decision of dangerousness is sustained by the hearing officer, the owner of the animal shall obey the order of compliance issued by the enforcement agent within the time given by the order of compliance or ten days whichever is more.
- I. If the animal is found not to be dangerous, the order of compliance is null and void. The finding that an animal is not dangerous does not prevent Camp Verde Animal Control or other Town enforcement agent from declaring an animal dangerous again if the agent has additional reasons to believe the animal is dangerous after a new evaluation of the animal is conducted.
- J. Appeal of the decision of the hearing officer shall be by way of special action to the Superior Court on the record of the hearing. If either party claims the record to be incomplete or lost, and the hearing officer who conducted the hearing certifies, a new hearing shall be conducted before that officer.  - b. The animal control officer may require the bottom of the confinement area to be concrete, cement or asphalt, or of blocks or bricks set in concrete or cement; or if such bottom is not provided then a footing of such material shall be placed along the whole perimeter of the confinement area to the depth of one foot below ground level, or deeper if required by the animal control officer.
 - c. The gates of the confinement area shall be locked at all times with a padlock except while entering or exiting.
 - d. The animal control officer may require temporary confinement measures until the order of compliance has been obeyed or the hearing officer determines that the animal is not dangerous. If the owner does not immediately comply with the temporary confinement requirements, the animal shall be impounded.

2. Muzzle and restrain the animal outside the confinement area with a leash, chain, rope or similar device not more than six feet in length sufficient to restrain the animal and under the control of a person capable of preventing the animal from engaging in any prohibited behavior.
3. Post a sign on every gate or entry way to the confinement area stating "Beware of Dangerous Animal, Per Camp Verde Animal Control Code Chapter 6."

The animal control officer shall maintain a registry of the animals, owners and insurance carrier for each dangerous animal.

- B. The animal control officer may seize and impound the dangerous animal if the owner fails to obey the order of compliance. Five days after the seizure, the animal control officer may humanely destroy the animal unless the owner has demonstrated obedience to the order of compliance. The owner of the animal is responsible for any impound fees. If the owner of the animal demonstrates proof that the order of compliance has been obeyed, then the animal will be returned to the owner after payment of impound fees. Any action under this Article shall be in addition to any available penalties.

SECTION 6-2-8 REQUIRED ACTS AND UNLAWFUL ACTIVITIES

Whenever in this Article any act is prohibited or declared to be unlawful or the doing of any act is required or the failure to do an act is declared to be unlawful, the violation of such provision is a misdemeanor punishable, except for the penalties already set forth herein, by a fine of not less than one hundred dollars (\$100) and not more than one thousand dollars (\$1,000) and/or by imprisonment of not more than six months. The judge may not grant probation in lieu of, or otherwise suspend, the imposition of the minimum fine prescribed. In addition, a person may be placed on probation for not more than three years. The permitted fines set forth in this Section shall not be construed in any way to require only the imposition of the minimum mandatory penalties provided herein.
- B. Each day any violation continues or occurs shall constitute a separate offense.

SECTION 6-2-10 AUTHORITY TO ENFORCE, REMOVE AND IMPOUND

- A. Authority to enforce
Any peace officer or Camp Verde Animal Control Officer or other designated Town enforcement agent is hereby authorized and empowered to enforce the provisions of this chapter and to issue citations for violations thereof. 4. A determination that the variance is the minimum necessary to afford relief, considering the flood hazard.
5. Submission to the applicant of written notice specifying the difference between the design flood elevation and the elevation to which the building is to be built, stating that the cost of flood insurance will be commensurate with the increased risk resulting from the reduced floor elevation, and stating that construction below the design flood elevation increases risks to life and property.

7. Give such other data and information as required by the Building Official.

7-2-104.9 Action on application. The Building Official shall examine or cause to be examined applications for permits, related documents, and amendments thereto within a reasonable time after filing. If the application or the construction documents do not conform to the requirements of pertinent laws, the Building Official shall reject such application in writing, stating the reasons therefor. If the Building Official is satisfied that the proposed work conforms to the requirements of this Chapter, the technical codes and applicable laws and ordinances thereto, the Building Official shall issue a permit therefor as soon as practicable, subject only to the payment of appropriate fees.

7-104.10 Time limitation of application. An application for a permit for any proposed work shall be deemed to have been abandoned and expired 180 days after the date of filing, unless such application has been pursued in good faith or a permit has been issued; except that the Building Official is authorized to grant a one-time extension of time for an additional period not exceeding 180 days. The extension shall be requested in writing and justifiable cause demonstrated.

7-104.10.1 Exception: Within 90 days of the date of application expiration and for those applications with a ready to issue status prior to the 360-day expiration date, the applicant shall resubmit plans and pay fifty percent (50%) of the current permit fees.

7-2-104.11 Validity of permit. The issuance or granting of a permit shall not be construed to be a permit for, or an approval of, any violation of any of the provisions of this Chapter, the technical codes or of any other ordinance of the jurisdiction. Permits presuming to give authority to violate or cancel the provisions of this Chapter, the technical codes or other ordinances of the jurisdiction shall not be valid. The issuance of a permit based on construction documents and other data shall not prevent the Building Official from requiring the correction of errors in the construction documents, other data, or in the actual construction. The Building Official is also authorized to prevent occupancy or use of a structure where in violation of this Chapter, the technical codes or of any other ordinances of this jurisdiction. Work shall be installed in accordance with the approved construction documents, and any changes made during construction that are not in compliance with the approved construction documents shall be resubmitted for approval as an amended set of construction documents.

7-2-104.12 Expiration of permit. Every permit issued shall become invalid unless the work on the site authorized by such permit is commenced within 180 days after its issuance, or if the work authorized on the site by such permit is suspended or declared abandoned by the owner for a period of 180 days after the date the work is commenced, or if the Building Official declares the permit suspended or abandoned after the expiration of 180 days from the date of permit issuance. The Building Official is authorized to grant a one-time extension of 180 days in accordance with **Sections 7-2-104.13.1 and 7-2-104.13.2.**

7-2-104.13.1 Work not commenced. Every permit issued under the provision of this Chapter and the technical code shall be valid for a period of one year from the date of issuance provided, however, that any permit shall expire if work authorized by such permit is not commenced and an approved inspection obtained within 180 days from the date of issuance. An approved inspection shall be an inspection that is requested and approved pursuant to Section 7-2-106.6. Before work can be commenced on a structure for which the permit has expired, a new permit shall be obtained and the fee therefore shall be based on the total valuation of the structure.

7-2-104.13.1.2 Exception: Where no work has commenced within 180 days from the date of issuance, the permit may be reinstated, without a fee upon a written or verbal request from the owner or owner's agent, provided work commences and an approved inspection is obtained within one year of the original date of issuance.

7-2-104.13.2 Work commenced. Every permit issued under the provisions of this code shall be valid for a period of one year from the date of issuance, provided, however, that any permit shall expire 180 days after the last approved inspection. An approved inspection shall be an inspection that is requested and approved pursuant to Section 7-2-106.6. Before work can be continued or resumed on a structure for which the permit has expired, a new permit shall be obtained and the fee thereof shall be determined by the Building Official on the basis of the valuation of the uncompleted portion of the work from the last approved inspection.

7-2-104.13.2.1 Exceptions:

1. A permit shall not expire if the time between approved inspections does not exceed 180 days.
2. If an approved inspection is not obtained within 180 days of the last approved inspection, the permit may be reinstated once, without a fee upon written or verbal request from the owner or owner's agent provided that no substantial changes have been made in the original plans and specifications for such work and provided further that an approved inspection is obtained within one year of the last approved inspection and the technical codes have not been updated

7-2-104.14 Unfinished buildings or structures. Whenever work has commenced on a building or structure for which a permit has been issued, and said permit has expired pursuant to **7-2-104.12**, the owner of the property upon which structure is located, or other person or agent in control of said property, upon receipt of notice in writing from the Department, shall within 30 days from the date of such written notice, obtain a new permit to complete the work and diligently pursue the work to completion, or within said 30 days, obtain a demolition permit and shall remove or demolish the building or structure within 120 days from the date of written notice. Notwithstanding the provisions of Section **7-2-104.8** and this section, whenever work on any building, structure, addition, alteration, appendage or repair has commenced, the exterior walls and roof shall be completed in accordance with the approved plans including but not limited to roofing, fenestration and finish materials including paint, within two years of commencing construction.

7-2-104.16 Placement of permit. The building permit or copy thereof shall be kept on the site of the work until the completion of the project. The issued inspection card shall be conspicuously posted on site.

SECTION 7-2-105 CONSTRUCTION DOCUMENTS

7-2-105.1 Submittal documents. Submittal documents consisting of construction documents, plans, specifications, engineering calculations, diagrams, soil investigation, geotechnical reports, special inspections and structural observation programs and other data, as required by the Building Official, shall be submitted with each application for permit in two or more sets. The construction documents shall be prepared by a registered design professional where required by Arizona State law and Section 7-2-105.3. Where special conditions exist, the Building Official is authorized to require additional construction documents to be prepared by a registered design professional.

7-2-105.1.1 Exception: The Building Official is authorized to waive the submission of construction documents and other data not required to be prepared by a design professional if it is found that the nature of the work applied for is such that review of construction documents is not necessary to obtain compliance with this Chapter, the technical codes and other ordinances of the Town.

7-2-105.1.2 Information on construction documents. Construction documents shall be in accordance with this section. Construction documents shall be dimensioned and drawn upon suitable material. Electronic media documents are permitted to be submitted when approved by the Building Official. Construction documents shall be of sufficient clarity to indicate the location, nature and extent of the work proposed and show in detail that it will conform to the provisions of this Chapter, the technical codes and relevant laws, ordinances, rules and regulations as determined by the Building Official.

7-2-105.1.3 Screening. Submittal construction documents, permit application, and other data may be subject to screening by the Building Official for completeness and code compliance prior to being accepted for permit review. Incomplete application submittals or application submittals containing readily apparent code violations shall be returned to the applicant without being accepted unless otherwise directed by the Building Official.

7-2-105.1.4 Title sheet information. The construction documents shall contain a title sheet or title sheets indicating the name, address and phone numbers of design professionals. The title sheet shall also contain information regarding the Code review as performed by the design professional, including the size of the building, type of construction, occupancy classification(s), area and height modifications (if any), fire sprinklers (if any), required special inspection (if any), deferred submittals (if any) and any other information as directed by the Building Official. The Building Official is authorized to waive or modify the requirement for a title sheet when the application for permit is for alteration or repair or when otherwise warranted.

7-2-105.1.5 Site plan. The construction documents submitted with the application for permit shall be accompanied by a site plan showing to scale the size and location of new construction and existing structures on the site, distances from lot lines, the established street grades and proposed finished grades and, as applicable, flood hazard areas, floodways, and design flood elevations; and it shall be drawn in accordance with an accurate boundary line survey. In the case of demolition, the site plan shall show construction to be demolished and the location and size of existing structures and construction that are to remain on the site or plot. The Building Official is authorized to waive or modify the requirement for a site plan when the application for permit is for alteration or repair or when otherwise warranted.

7-2-105.1.5.1 Design flood elevations. Where design flood elevations are not specified, they shall be established in accordance with International Building Code (IBC) Section 1612.3.1.

7-2-105.1.6 Means of egress. The construction documents shall show in sufficient detail the location, construction, size and character of all portions of the means of egress including the path of the exit discharge to the public way in compliance with the provisions of the technical codes. In other than occupancies in Groups R-2, R-3, and I-1 as applicable in Section **7-2-101.4.9**, the construction documents shall designate the number of occupants to be accommodated on every floor, and in all rooms and spaces. The Building Official is authorized to waive or modify the requirement for a means of egress plan when the application for permit is for alteration or repair or when otherwise warranted.

7-2-105.1.7 Exterior wall envelope. Construction documents for all buildings shall describe the exterior wall envelope in sufficient detail to determine compliance with the technical codes. The construction documents shall provide details of the exterior wall envelope as required, including flashing, intersections with dissimilar materials, corners, end details, control joints, intersections at roofs, eaves or parapets, means of drainage, water-resistive membrane and details around openings. The construction documents shall include manufacturer's installation instructions that provide supporting documentation that the proposed penetration and opening details described in the construction documents maintain the weather resistance of the exterior wall envelope. The supporting documentation shall fully describe the exterior wall system, which was tested, where applicable, as well as the test procedure used. The Building Official is authorized to waive or modify the requirement for an exterior wall envelope plan when the application for permit is for alteration or repair or when otherwise warranted.

7-2-105.2 Examination of documents. The Building Official shall examine or cause to be examined the permit application and accompanying construction documents and shall ascertain by such examinations whether the construction indicated and described is in accordance with the requirements of this Chapter, the technical codes and other pertinent laws or ordinances.

7-2-105.2.1 Approval of construction documents. When the Building Official issues a permit, the construction documents shall be approved, in writing or by stamp, as "Reviewed for Code Compliance." The Building Official as required by the approved Building Division retention schedule shall retain one set of construction documents so reviewed. The other set shall be returned to the applicant, shall be kept at the site of work and shall be open to inspection by the Building Official or a duly authorized representative. When the submittal documents are produced electronically, the applicant shall provide an electronic copy of all drawings on compact disk or other media approved by the Building Official.

7-2-105.2.2 Previous approvals. This Chapter and the technical codes shall not require changes in the construction documents, construction or designated occupancy of a structure for which a lawful permit has been heretofore issued or otherwise lawfully authorized, and the construction of which has been pursued in good faith and has not been abandoned pursuant to Section 7-2-104.10.

7-2-105.2.3 Phased approval. The Building Official is authorized to issue a permit for the construction of foundations, or other parts of a building or structure before the construction documents for the whole building or structure have been submitted, provided that adequate information and detailed statements have been filed complying with pertinent requirements of this Chapter and the technical codes. The holder of such permit for the foundation or other parts of a building or structure shall proceed at the holder's own risk with the building operation and without assurance that a permit for the entire structure will be granted.

7-2-105.2.3.1 Exception: Phased construction approvals are not applicable for Group R-2, R-3 and R-4 occupancies and detached one- and two-family dwellings and multiple single-family dwellings (townhouses) not more than three stories high.

7-2-105.3 Design professional in responsible charge. When it is required that permit submittal documents be prepared by a registered design professional, the Building Official shall be authorized to require the owner to engage and designate on the building permit application a registered design professional who shall act as the registered design professional in responsible charge. If the circumstances require, the owner shall designate a substitute registered design professional in responsible charge who shall perform the duties required of the original registered design professional in responsible charge. The Building Official shall be notified in writing by the owner if the registered design professional in responsible charge is changed or is unable to continue to perform the duties. The registered design professional in responsible charge shall be responsible for reviewing and coordinating submittal documents prepared by others, including phased and deferred submittal items, for compatibility with the design of the building.

7-2-105.3.1 Special Inspections and structural observations. Where application is made for construction as described in the International Building Code (IBC) Section 1704, the owner or the registered design professional in responsible charge acting as the owner's agent shall employ one or more approved agencies to perform inspections during construction on the types of work listed under International Building Code (IBC) Section 1705. Prior to the commencement of structural observations or special inspections, the Building Official shall be notified in writing by the owner or design professional in responsible charge with the name of the individual or firms who are to perform structural observations and special inspections and describe the stages of construction where the structural observations and special inspections are to occur.

7-2-105.3.2 Deferred submittals. For the purposes of this section, deferred submittals are defined as those portions of the design that are not submitted at the time of the application and that are to be submitted to the Building Official within a specified period, before completion of the project, and before a Certificate of Occupancy is issued. Deferral of any submittal items shall have the prior approval of the Building Official. The registered design professional in responsible charge shall list the deferred submittals on the title sheet of the construction documents for review by the Building Official. Deferred submittal items shown on the construction documents shall be clearly noted as "For Reference Only". Deferred submittals do not constitute phased approval of the construction. Documents for deferred submittal items shall be submitted to the registered design professional in responsible charge, who shall review them and forward them to the Building Official with a notation indicating the deferred submittal documents have been reviewed and been found to be in general conformance to the design of the building. The deferred submittal items shall not be installed until the deferred submittal documents have been approved by the Building Official.

7-2-105.4 Amended construction documents (revisions). Work shall be installed in accordance with the approved construction documents, and any changes made during construction that are not in compliance with the approved construction documents shall be resubmitted for approval as an amended set of construction documents.

7-2-105.5 Responsibility. It shall be the duty of every person who performs work for the installation or repair of building, structure, electrical, gas, mechanical, plumbing, or fire-suppression systems, for which this Chapter or the technical codes are applicable, to comply with this Chapter and the technical codes.

7-2-105.6 Retention of construction documents. One set of approved construction documents shall be retained by the Building Official for a period of time as prescribed by state or local laws and one set of approved construction documents shall be returned to the applicant, and said set shall be kept on the site of the building or work at all times during which the work authorized thereby is in progress.

SECTION 7-2-106 INSPECTIONS

7-2-106.1 General. Construction or work for which a permit is required shall be subject to inspection by the Building Official and such construction or work shall remain accessible and exposed for inspection purposes until approved. Approval as a result of an inspection shall not be construed to be an approval of a violation of the provisions of this Chapter, the technical codes or of other ordinances of the jurisdiction. Inspections presuming to give authority to violate or cancel the provisions of this Chapter or the technical codes or of other ordinances of the jurisdiction shall not be valid. It shall be the duty of the permit applicant to cause the work to remain accessible and exposed for inspection purposes. Neither the Building Official nor the jurisdiction shall be liable for expense entailed in the removal or replacement of any material required to allow inspection.

7-2-106.2 Site identification. It shall be the duty of the permit holder to provide an approved property address, including number and street name, at all construction sites. Such temporary premises identification shall be clearly visible from the street or roadway fronting the property, shall be installed prior to the first inspection, and shall be maintained until the permanent premises identification is installed and approved.

7-2-106.3 Inspection record card. Work requiring a permit shall not commence until the permit holder or an agent of the permit holder has posted or otherwise made available the inspection record card to allow the Building Official or authorized agent to conveniently make the required entries thereon regarding inspections of the work. The permit holder shall maintain the card available until final approval, by the Building Official, has been granted.

7-2-106.4 Preliminary inspections. Before issuing a permit, the Building Official is authorized to examine or cause to be examined buildings, structures or sites for which an application has been filed.

When special inspection is required by the International Building Code (IBC) Sections 1704 and 1705 or as determined by the Building Official, the owner, an agent of the owner, or the engineer or registered design professional in responsible charge, but not the contractor or any other person responsible for the work, shall employ one or more special inspector(s) who shall provide inspections during construction on the type of work listed under International Building Code (IBC) Sections 1704 and 1705 of the building code or as determined by the Building Official. When special inspections are required, the special inspections are to be performed in addition to, not in lieu of, the inspections conducted by the Building Official, and shall not be construed to relieve the owner or his

authorized agent from requesting the periodic and called inspections required by this Chapter and the technical codes.

7-2-106.5.1 Special Inspector. In accordance with the International Building Code (IBC) Sections 1704 and 1705 and Section 7-2-106.5 of the building code, special inspections shall be provided by, or under the supervision of an engineer or registered design professional in responsible charge of the structural inspection for which "Special Inspection" is required, subject to the following conditions:

7-2-106.5.1.1 Notification. Prior to a permit being issued by the Building Official, the owner or his authorized agent shall notify the Building Division of the Community Development Department in writing on the form provided, the name of the engineer or registered design professional in responsible charge who will carry out the required special inspection(s). The responsible engineer or registered design professional of record shall notify the Building Division of any changes of "Special Inspection(s)" prior to the inspections being conducted.

The engineer or registered design professional in responsible charge of the special inspection(s) shall so certify to the Building Division in writing on the form provided prior to the issuance of the building permit, and shall notify the Building Division immediately if terminated prior to completion of the work, for which special inspection(s) is required.

7-2-106.5.1.3 Qualifications. No person(s) shall be assigned to carry out the duties of special inspector(s) unless thoroughly qualified by knowledge and experience to render full, complete and competent inspection. Special inspector(s) shall provide written documentation to the Building Official demonstrating his or her competence and relevant experience or training. Experience or training shall be considered relevant when the documented experience or training is related in complexity to the same type of special inspection activities for projects of similar complexity and material qualities. These qualifications are in addition to qualifications specified in other sections of this code. The registered design professional in responsible charge and engineers of record involved in the design of the project are permitted to act as the approved agency and their personnel are permitted to act as the special inspector for the work designed by them, provided they qualify as special inspectors. It shall be the responsibility of the engineer or registered design professional in responsible charge of the special inspection to satisfy the duties and responsibilities as stated in the International Building Code (IBC) Sections 1704 and 1705.

7-2-106.5.1.4 Inspection and Reports. The engineer or registered design professional in responsible charge of the special inspection(s) or the designated special inspector(s) shall provide continuous, competent and complete inspection on the work for which special inspection(s) is required in accordance with International Building Code (IBC) Sections 1704 and 1705. Special inspectors shall keep records of inspections. Reports shall indicate that work inspected was or was not completed in conformance to approved construction documents. Discrepancies shall be brought to the immediate attention of the contractor for correction. The special inspector(s) shall notify the Building Division and the registered design professional in responsible charge immediately upon detection of all discrepancies involved in the special inspection(s) that have not been corrected in accordance with the approved construction documents and specifications prior to proceeding with the work. A final report documenting required special inspections and correction of any discrepancies noted in the inspections shall be submitted at a point in time agreed upon prior to the start of work by the applicant and the Building Official.

For concrete foundations, the required forms shall be in place prior to inspection. An inspection shall be made prior to the placement of concrete. Materials for the foundation shall be on the site, except where concrete is ready mixed in accordance with ASTM C 94; the concrete need not be on the site.

7-2-106.6.2 Underground building service equipment inspections. Underground plumbing, gas, mechanical, or electrical systems shall be inspected after trenches or ditches are excavated for approved materials, proper burial depth, slope, and installation prior to the backfilling of trenches. The piping shall be bedded-in for its entire length, and if applicable, the systems shall be under the prescribed tests required by the technical codes. When excavated soil contains rocks, broken concrete, frozen chunks and other rubble that would damage or break the piping or cause corrosive action, clean backfill shall be on the site.

Sewer or water service lines, that provide(s) service to a building or multiple buildings on one site and not installed in a public right-of-way or Public Utility Easement (PUE), shall be inspected for approved materials and proper slope prior to backfilling of the trenches.

7-2-106.6.5 Floodplain or lowest floor elevation inspections. In flood hazard areas, upon placement of the lowest floor, including the basement, and prior to further vertical construction, the elevation certification required in the International Building Code (IBC) Section 1612.5 and International Residential Code (IRC) Section R322 shall be submitted to the Building Official. The elevation certification shall be prepared and sealed by a registered design professional.

7-2-106.6.6 Concrete or masonry walls or columns inspections. Walls and columns shall be inspected after all reinforcing steel, and if applicable, conduits and other piping are in place but prior to the placement of concrete or grout. For concrete walls or columns, required forms shall be in place prior to inspection. Masonry walls or columns constructed in lifts shall require an inspection prior to the grouting of each lift.

7-2-106.6.8 Rough building service equipment inspections. Rough plumbing, gas, mechanical, or electrical systems shall be inspected for approved materials or proper slope after the roof, framing, fire-blocking and bracing are in place and components to be concealed are complete, and prior to the installation of wall or ceiling membranes. When applicable, the systems shall be under the prescribed tests required by the technical codes. When applicable, these inspections may be completed in conjunction with a frame inspection.

7-2-106.6.9 Frame inspections. Framing inspections shall be made after the roof deck or sheathing, all framing, fire-blocking, draft stopping and bracing are in place, and pipes, chimneys and vents to be concealed are complete and the rough electrical, plumbing, heating wires, pipes and ducts building service equipment has been approved, after the roof is loaded with roof covering material and the building has been dried-in.

Energy efficiency inspections shall be made to determine compliance with the International Building Code (IBC) Chapter 13 and the International Energy Conservation Code (IECC) and shall include, but not be limited to, inspections for: envelope insulation R- and U-values, fenestration U-value, duct system R-value, and HVAC and water-heating equipment efficiency. Insulation inspection shall be made after frame and exterior lath inspection and all rough plumbing, mechanical, gas, and electrical systems are approved and prior to covering or concealment. Blown or sprayed roof/ceiling insulation may be verified before final inspection with markers affixed to the trusses or joists and marked with the insulation thickness by one inch (25.5 mm) high numbers. A minimum of one (1) marker provided for each 300 square feet of area with numbers to face the attic access opening. In lieu of an insulation inspection, a certification from the insulation installer may be submitted.

7-2-106.6.11 Moisture barrier inspections. A moisture barrier inspection shall be performed after all flashings, windows, and moisture barrier is installed prior to the installation of any exterior wall covering.

7-2-106.6.12 Lath and gypsum board inspections. Lath and gypsum board inspections shall be made after lathing and gypsum board, interior and exterior, is in place, but before any plastering is applied or gypsum board joints and fasteners are taped and finished.

7-2-106.6.12.1 Exception: Gypsum board that is not part of a fire-resistance-rated assembly or a shear assembly.

7-2-106.6.13 Fire- and smoke-resistant penetrations inspections. Protection of joints and penetrations in fire-resistance-rated assemblies, smoke barriers and smoke partitions shall not be concealed from view until inspected and approved. When applicable, this inspection shall be done in conjunction with the gypsum board inspection prior to joints and fasteners being taped and finished.

7-2-106.6.14 Other inspections. In addition to the inspections specified above, the Building Official is authorized to make or require other inspections of any construction work to ascertain compliance with the provisions of this Chapter or the technical codes and other laws enforced by the Building Division.

7-2-106.6.15 Special inspections. Special inspections and structural observations shall be as required in Section 1704 and 1705 of the International Building Code (IBC) in accordance with Section 7-2-106.5 of this Chapter. Special inspections are in addition to, not in lieu of, the inspections conducted by the Building Official.

7-2-106.6.16 Final inspections. The final inspection shall be made after all work shown on the construction documents or as required by the permit is completed.

7-2-106.6.16.1 Flood hazard or elevation documentation. If located in a flood hazard area, documentation of the elevation of the lowest floor as required in the International Building Code (IBC) Section 1612.5 and International Residential Code (IRC) Section R322.1.10 shall be submitted to the Building Official prior to the final inspection.

7-2-106.6.16.2 Building service equipment. Building service equipment regulated by this Chapter or the technical codes shall not be connected to the fuel or power supply, or water or sewer systems until authorized by the Building Official. The requirements of this Chapter shall not be considered as prohibiting the operation of building service equipment installed to replace existing building service equipment serving an occupied portion of the building provided an inspection of such building service equipment has been completed and approved for use.

7-2-106.7 Inspection agencies. The Building Official is authorized to accept reports of approved inspection agencies, provided such agencies satisfy the requirements as to qualifications and reliability. An approved inspection agency shall be objective, competent and independent from the contractor responsible for the work being inspected. The agency shall also disclose possible conflicts of interest so that objectivity can be confirmed. An approved inspection agency shall also have adequate equipment to perform required tests and shall employ experienced personnel educated in conducting, supervising and evaluating tests and/or inspections.

7-2-106.8 Inspection requests. It shall be the duty of the holder of the building permit or their duly authorized agent to notify the Building Official when work is ready for inspection. It shall be the duty of the permit holder to provide access to and means for inspections of such work as required by this Chapter. The Building Official may require that every request for inspection be filed at least one working day before such an inspection is desired.

7-2-106.9 Approval required. Work shall not be done beyond the point indicated in each successive inspection without first obtaining the approval of the Building Official. The Building Official, upon notification, shall make the requested inspections and shall either indicate the portion of the construction that is satisfactory as completed, or notify the permit holder or his or her authorized agent wherein the same fails to comply with this Chapter or the technical codes. Any portions that do not comply shall be corrected and such portion shall not be covered or concealed until authorized by the Building Official. There shall be a final inspection and approval of all construction when the work is completed and prior to any occupancy or use.

7-2-106.10 Re-inspection. A re-inspection fee may be assessed for each inspection or re-inspection when such portion of work for which inspection is called is not complete or when corrections called for are not made. This section is not to be interpreted as requiring re-inspection fees the first time a job is rejected for failure to comply with the requirements of the technical codes, but as controlling the practice of calling for inspections before the job is ready for such inspection or re-inspection. Re-inspection fees may be assessed:

1. When the inspection record card is not posted or otherwise available on the work site.
2. When the approved plans are not readily available to the inspector.
3. For failure to provide access on the date for which inspection is requested.
4. For deviating from approved plans thereby requiring the approval of the Building Official.
5. When requested work is not ready for inspection.

To obtain a re-inspection, the applicant shall pay the re-inspection fee as set forth in the fee schedule adopted by this jurisdiction. In instances where re-inspection fees have been assessed, additional inspection of the work will not be performed until the required fees have been paid.

7-2-106.11 Connection to utilities. No person shall make connections from a utility, source of energy, fuel or power to any building or building service equipment, regulated by the technical codes for which a permit is required by this Chapter, until approved by the Building Official. The Building Official may authorize the temporary connection of the building service equipment to the utility source of energy, fuel or power for construction power, testing of building service equipment or for use under a temporary certificate of occupancy.

SECTION 7-2-107 CERTIFICATE OF OCCUPANCY AND FINAL APPROVALS

7-2-107.1 Use and occupancy. Article 7-8

PLACEMENT OF UTILITIES UNDERGROUND AND ESTABLISHING A PERMIT

A. Definitions:

Developer shall be deemed to be any individual, firm, corporation, partnership, association, syndication, trust, governmental agency, or other legal entity that is responsible for the development or redevelopment of land that created any demand for any utility service or causes alteration of existing utility services, other than the serving utility.

Existing utility system means such poles, structures, wires, cables transformers, and other related facilities that are in place and in operation within 90 days of the effective date of this ordinance, or improvements or changes hereinafter made to maintain service capabilities or existing facilities and utility drops, but it does not include extensions made to existing distribution lines.

New utility system means such poles and structures, wires, cables, transformers, and all other related facilities used in or as a part of the distribution or transmission of electricity, telephone, telegraph, radio, internet, or television communications that are not in place as of the effective date of this ordinance, or new extensions made from existing poles and wires.

Service drop refers to that line which extends from the service utility's existing utility system and connects to the individual customer who is the ultimate user of that service.

- C. Permit for above Ground Installation. After the effective date of this ordinance, no developer shall erect any new utility system, nor relocate an existing utility system, within Town limits above the surface of the ground, whether along streets or over individual lots or parcels of the development, unless a special permit described herein is first granted by the Town. The undergrounding requirements herein shall apply regardless of the existence or availability of easements for overhead lines. The developer shall be required to comply with any underground policy of the utility, and undergrounding shall be completed and approved prior to any occupancy of the project. If poles are removed which include streetlights, the streetlights will be replaced by the developer at its cost with freestanding poles and luminaries approved by the Town. In the event the utility company adds new poles or lines as a system upgrade or power line extension, it shall be considered the developer, and pay any undergrounding costs. In cases where utility lines are required to be placed underground due to a combination of needs generated by (re) development, utility system upgrade, and governmental improvement projects, there shall be an equitable sharing of the cost of that undergrounding effort between the Town or governmental agency, utility, and developer.
- D. Exemptions. This ordinance shall not apply to transmission or feeder lines having a voltage rating greater than 12,500 volts; switchyards and substations utilized in a new utility system; pad-mounted transformers, cabinets, pull boxes, and similar on-the-ground equipment; temporary service equipment for emergency services, special events, or construction sites; service drops from existing overhead lines, unless underground service is required under municipal or state subdivision statutes or codes; or normal maintenance and repairs of existing utility systems.
- E. Special Permits. A special permit to waive the underground requirements of this ordinance may be issued by the Town. Granting of a special permit is rare and shall not undermine the purpose of the ordinance. Cost disparity in itself shall not constitute grounds for issuance of a special permit. A request for the special permit shall be filed with the Community Development Director for approval. If the permit is denied, the applicant may file a request for review with the Planning & Zoning Commission for their recommendation. The final decision on an appeal shall be with the Town Council.
- F. Permits. Developers shall be required to submit a written application to obtain a construction permit for undergrounding of facilities as part of the permit process. The content of the permit shall be established from time-to-time by the Community Development Director and/or Director of Public Works/Town Engineer, but shall include as a minimum:
 - Plot plans to scale showing the proposed location of the underground facilities, cross-sections of the below grade areas, and other information necessary to properly identify and record the work
 - Roadway cut permits from the Town or ADOT, and a traffic control plan, if needed
 - Performance bonds and insurance

BMP’s are site-specific and are described in the document “Storm Water Management for Construction Activities: Developing pollution Prevention Plans and Best Management Practices” (EPA 832-R-92-005) or other guidance documents available from EPA and /or ADEQ.
- C. The written petition must be received within ten (10) working days setting forth any reasons and proposed alternative. The Engineer will act within thirty (30) days of receipt of the petition.

Section 7-9-9 Post-Construction

- B. The owner or operator shall notify the Engineer of the discharge in both of the following manners:
 - 1. By telephone as soon as practical or by calling 9-1-1 if hazardous materials are involved; and
 - 2. By written report identifying the discharge source, extent, pollutant, measures taken to mitigate the discharge, and preventative measures put in place to prevent a subsequent discharge.

Section 7-9-11 Inspections

- A. **AUTHORITY TO INSPECT.** Upon presentation of credentials and at all reasonable or necessary hours, all authorized employees of the Town shall have access to all premises and to all records pertaining to those premises for purposes of ensuring compliance with this Article. All persons shall allow such activities under safe and non-hazardous conditions with a minimum of delay.
- B. **MONITORING ACTIVITIES.** The Engineer may order any person engaged in any activity or owning or operating a business or enterprise on any premises which may cause or contribute to discharges of pollutants to the public storm drain system in violation of this Article or any applicable NPDES or AZPDES Storm Water permit condition to undertake such monitoring activities and analyses and furnish such reports as the Engineer reasonably may specify. The costs of such activities analyses and reports shall be borne by the recipient of the order.
- C. **ACCESS REFUSAL.** If an authorized employee of the Town has been refused access to any premises, and is able to demonstrate probable cause to believe that there may be a violation of this Article, or that there is a need to inspect, interview, copy, photograph or sample as part of an inspection and sampling procedure of the Town designed to determine compliance with the requirements of this Article or any related laws or regulations, or to protect the environment and the public health, safety and welfare of the community, then the Engineer may seek issuance of a search warrant from the Town Municipal Court.

- A. **CHARGES.** Charges levied pursuant to this Article shall be collected by the Public Works Department. The Public Works Director/Engineer shall manage the Town's Storm Drain System.
- B. **OWNER OF RECORD.** The owner of record of the property upon which a violation of this Article occurs shall be presumed to be a person having lawful control over the activity or premises unless it is demonstrated that another person has knowingly and in good faith accepted responsibility for the activity at issue. If more than one person is identified as the owner, such persons shall be presumed to be jointly and severally in lawful possession and control the activity or premises.
- C. **NOTICE OF VIOLATION.** The Engineer may issue a written notice of violation to any person who has violated or is in violation of this Article. Failure to comply with any act required in the notice of violation shall be a separate violation for each day beyond the thirtieth (30) day following the notice of violation. Nothing in this section shall limit the authority of the Engineer to take any action, including emergency actions or any other enforcement action, without first issuing a notice of violation. In appropriate situations the Engineer may notify the person orally either in person or by telephone prior to, and in some cases in lieu of, written notification.
- D. **CONSENT ORDERS.** The Engineer may enter into consent orders, assurances of voluntary compliance, negotiated settlement agreements or other similar documents establishing an

agreement with any person responsible for noncompliance. Such documents will include specific action to be taken by the person to correct the noncompliance within a time period specified by the document, including an identification and description of the Best Management Practices and measures to utilize in implementing the order. Such documents shall have the same force and effect as any other orders issued under this Article and shall be judicially enforceable.

- E. CEASE AND DESIST ORDERS. When the Engineer finds that a person has violated, or continues to violate, any provision of this Article or any related laws or regulations, or that the person's past violations are likely to recur, the Engineer may issue an order to the person directing them to cease and desist all such violations and direct the person to immediately comply with all requirements; and take such appropriate remedial or preventive action as may be needed to properly address a continuing or threatened violation. Issuance of a cease and desist order shall not be a bar against, or prerequisite for, taking any other action against the person. A person's failure to comply with an order of Engineer issued pursuant to this Article shall constitute a violation of this Article.
- F. CIVIL PENALTIES. In addition to any other enforcement authority contained in this Article, the Engineer may issue a civil citation to any person who has violated, or continued to violate, any provision of this Article or any related laws or regulations. A person who violates any requirement of this Article or any applicable NPDES or AZPDES Storm Water permit condition shall be civilly liable to the Town for a sum not to exceed \$27,500 per day for each violation.
- G. CRIMINAL PENALTIES. A person who willfully or negligently violates any provision of this Article, or any related laws or regulations shall, upon conviction, be guilty of a misdemeanor and upon conviction thereof shall be punished by a fine not to exceed \$27,500 per day for each violation and/or by imprisonment for a period not to exceed six months.
- H. CRIMINAL PROSECUTION. Some intentional violations may constitute criminal violations of Federal, State, and Town Law, and that under such circumstances, the Engineer may seek the assistance of the EPA, the Attorney General, the County Attorney, or the Town prosecutor to commence civil and/or criminal action against any person who violates any requirement of this Article or any applicable NPDES or AZPDES Storm Water Permit condition.
- I. REVOKING OR WITHHOLDING OF PERMIT. In addition to or in lieu of all other available penalties, the Town may revoke or withhold any permit, approval or license to construct improvements to real property or operate a business in the Town related to the violation if the holder of such permit, approval, or license is in violation of any requirement of his Article or any applicable NPDES or AZPDES Storm Water Permit condition.
- J. LIABILITY FOR COSTS. The Engineer may assess liability for costs to any person in violation of this Article for all actual costs incurred by the Town in surveillance, sampling and testing, abatement, and remediation associated with a discharge. Additionally, the Engineer may assess liability for costs to any person whose discharge resulted in a violation of the Towns AZPDES Storm Water Permit.

- C. New Development Affected. This Development Fee Code shall apply to all New Developments.
 - 1. Municipal Planning Areas. Development Fees imposed by the Town may, if necessary and appropriate, be collected by other municipalities or by Yavapai County on New Development within the Town's Municipal Planning Area, but outside of the Town of Camp Verde limits, pursuant to an intergovernmental agreement which provides that the Development Fees collected be transferred to the appropriate Town fund for expenditure in accordance with the terms of this Development Fee Code.
 - 2. Exceptions to the application of Development Fees to New Development. Unless otherwise expressly noted, the fees imposed by this Article shall not apply in the following circumstances:
 - a. Previously-Issued Building Permits. No Development Fee shall be imposed on New Development for which a building permit has been issued prior to the effective date of this Development Fee Code.
 - b. No Net Increase in Dwelling Units. No Development Fee shall be imposed on any new residential development which does not add a new Dwelling Unit.

- c. No Net Increase in Non-Residential Square Footage. No Development Fee shall be imposed on any new non-residential development which does not add square footage to a currently existing facility, unless the new non-residential development will increase the demand for Public Facilities for which Development Fees are being imposed.
 - d. Other Uses. No Development Fee shall be imposed on a use, development, project, structure, building, fence, sign or other activity, whether or not a building permit is required, which does not result in an increase in the demand for Public Facilities.
 - e. Other Development Exempted by State Law. No Development Fee shall be imposed on New Development which is exempted by Arizona State laws; however, the Town may seek to negotiate the construction of Public Facilities or the provision of services, or to negotiate the payment of Development Fees with such entities. See *A.R.S. § 9-500(18)*.
3. Effect of Payment of Development Fees on Other Applicable Town Land Use, Zoning, Platting, Subdivision or Development Regulations. The payment of Development Fees shall not entitle the Applicant to a building permit, which shall only be issued if all other applicable land use, zoning, planning, platting, subdivision or other related requirements, standards and conditions have been met. Such other requirements, standards and conditions are independent of the requirement for payment of a Development Fee.
 4. Amendments. This Development Fee Code may be amended from time to time by the Mayor and Council; provided, however, that no such amendment shall be adopted without a written report detailing the reasons and need for the increase or establishment of a new Development Fee without proper notice and public hearing as set forth in A.R.S. § 9-463.05(C).
 5. Effect of Imposition of Development Fees in a Community Facilities District. In calculating and imposing a Development Fee applicable to land in a community facilities district established under Arizona Revised Statutes, Title 48, Chapter 4, Article 6, the Town shall take into account all public infrastructure provided by the district and capital costs paid by the district for necessary public services and facilities and shall not assess a portion of the Development Fee otherwise calculated to be due that would duplicate the infrastructure provided by the district or the costs imposed by the district on New Development.

Section 7-10-4 Procedures for Imposition, Calculation and Collection of Development Fees

- A. In General. The Town shall calculate the Development Fees due and owing for any Applicant at the time of the issuance of a building permit. The Applicant shall pay the Development Fees prior to and as a condition of the issuance of a building permit.
- B. Calculation.
 1. Upon receipt of an application for a building permit, the Town shall determine (a) whether the permit is for a residential or non-residential use, (b) the specific category (type) of residential or non-residential development, if applicable, (c) if residential, whether the use is single-family, multifamily or mobile home, and (d) if non-residential, the number of new or additional square feet of gross floor area (rounded up to the nearest square foot) and the proposed use of the facility.
 2. Upon receipt of an application for a building permit relating to an existing facility, the Town shall determine whether the permit will result in a change in use. In such cases, the Development Fee due shall be based only on the incremental increase in the Development Fee(s) for the additional Public Facilities needed to accommodate the change in use.

3. After making the determinations in the Paragraph B of this Section 7-10-4, the Town shall calculate the Development Fee pursuant to Table One of Section 7-10-5 of this Development Fee Code by incorporating any applicable offset.
4. If the type of land use proposed for New Development is not expressly listed in the particular Development Fee schedule, the Town shall, at its option and in its discretion, determine the basis used to calculate the Development Fee(s) by:
 - a. identifying the most similar land use type listed and calculate the Development Fee based on the Development Fee for that land use; or
 - b. identifying the broader land use category within which the specified land use would apply and calculate the Development Fee based on the Development Fee for that land use category; or
 - c. reference to an independent impact analysis for Development Fee calculation. If this option is chosen, the following shall apply:
 - (i) The Applicant shall be responsible, at its sole expense, for preparing the independent impact analysis, which shall be reviewed for approval by the Town Engineer and the Town Manager prior to the Town's notification pursuant to paragraph (iii) of this subparagraph.
 - (ii) The independent impact analysis shall measure the impact that the proposed New Development will have on the particular Public Facility at issue, and shall be based on the same methodologies used in the Development Fee calculation methodology report, and shall be supported by professionally acceptable data and assumptions.
 - (iii) After review of the independent analysis submitted by the Applicant, the Town shall accept or reject the analysis and provide written notice to the Applicant of its decision on a form provided for such purpose within thirty (30) days of the submission of the completed independent impact analysis. If the independent impact analysis is rejected, the written notice shall provide an explanation of the insufficiencies of the analysis.
 - (iv) The final decision of the Town Engineer may be appealed pursuant to this Article.
5. An Applicant may request a non-binding estimate of Development Fees due for a particular New Development at any time by filing a request on a form provided for such purpose by the Town. The Applicant must acknowledge that the estimate may be subject to change when a formal application for a building permit for New Development is made. Such non-binding estimate is solely for the benefit and convenience of the prospective Applicant and shall in no way bind the Town nor preclude it from making amendments or revisions to any provisions of this Development Fee Code, the specific Development Fees or the Development Fee schedules.
6. The calculation of Development Fees due from a Multiple-Use New Development shall be based upon the aggregated demand for each Public Facility generated by each land use type in the New Development.
7. The calculation of Development Fees due from a phased New Development shall be based upon the demand generated by each specific land use within the phase of development for which a separate building permit is requested.
8. Development Fees shall be calculated based on the Development Fee amount in effect at the time of application for a building permit.
- C. Offsets. The Town Manager, or his designee, shall perform the actions of the Town in accordance with this Paragraph C unless specifically stated otherwise.

1. Offsets against the amount of a Development Fee due from a New Development shall be provided for, among other things, contributions made in cash, or by dedication of land (if accepted or required by the Town) or by actual construction of all or part of a Public Facility acceptable to the Town by the affected property owner meeting or exceeding the demand generated by the New Development, and the contribution is determined by the Town to be a reasonable substitute for the cost of Public Facilities which are included in the particular Development Fee calculation methodology.
 2. The amount of the excess contribution shall be determined by the Town upon its receipt of a written application requesting an offset; provided, however, that (a) the Town will make no reimbursement for excess contributions unless and until the particular Public Facility fund has sufficient revenue to make the reimbursement without jeopardizing the continuity of the Town's capital improvements program and (b) the excess contribution may not be transferred or credited to any other type of Development Fees calculated to be due from that development for other types of Public Facilities. The determination of the eligibility for and the amount of the credit shall be made by the Town on a form provided for such purposes. If the Applicant contends that any aspect of the Town's decision constitutes an abuse of discretion, the Applicant shall be entitled to appeal pursuant to this Article.
 3. No offset shall be allowed unless the Town has approved the contribution or expenditure before it is or was made.
 4. Offsets for dedication of land or provision of Public Facilities shall be applicable only as to Development Fees imposed for the same types of Public Facilities which are proposed to be dedicated or provided. Even if the value of the dedication of land or provision of a Public Facility exceeds the Development Fee due for the type of Public Facility, the excess value may not be transferred to Development Fees calculated to be due from the Applicant for other types of Public Facilities for which Development Fees may be imposed. Offsets may, however, be transferred to the same Applicant or to other Applicants for New Development which are proposed within the final approved platted area of the same development and for the same type of Public Facility.
- D. Collection.** The Town shall collect all applicable Development Fees at the time of issuance of a building permit and shall issue a receipt to the Applicant for such payment unless:
1. the Applicant is determined to be entitled to a full offset; or
 2. the Applicant has been determined to be not subject to the payment of a Development Fee; or
 3. the Applicant has filed an appeal protesting the imposition or calculation of the Development Fee and has posted with the Town a bond or other surety in the amount of the Development Fee, as calculated by the Town and approved by Town Attorney and Finance Director.
- E.** The Town shall collect a Development Fee at the time of issuance of a building permit even if Development Fees were paid by the Applicant at an earlier time in the development permit or approval process if the amount of the Development Fees has increased since such prior approval. In such case, the Applicant shall only be liable for the difference between the Development Fees paid earlier and those in effect at the time of issuance of the subsequent building permit.
- F. Establishment of Development Fee Accounts; Appropriation of Development Fee Funds; and Refunds.**
1. **Development Fee Accounts.** A Development Fee account shall be established by the Town for each category of Public Facilities for which Development Fees are imposed. Such account

shall clearly identify the category, account, or fund for which the Development Fees are imposed. All Development Fees collected by the Town shall be deposited into the appropriate Development Fee account or sub-account, which shall be interest bearing. All interest earned on monies deposited to such account shall be credited to and shall be considered funds of the account. The funds of each such account shall be capable of being accounted for separately from all other Town funds, over time. The Town shall establish and implement necessary accounting controls to ensure that the Development Fee funds are properly deposited, accounted for and appropriated in accordance with this Development Fee Code, A.R.S. § 9-463.05 and any other applicable legal requirements.

2. Appropriation of Development Fee Funds.

- a. In General. Development Fee funds may be appropriated for Public Facilities, for Public Facility expenditures as defined herein and for the payment of principal, interest and other financing costs on contracts, bonds, notes, or other obligations issued by or on behalf of the Town.
- b. Restrictions on Appropriations. Development Fees shall be appropriated only for the particular Public Facility, for which they were imposed, calculated and collected.

3. Refunds.

a. Eligibility for Refund.

- (i) Expiration or Revocation of Building Permit. An Applicant who has paid a Development Fee for a New Development for which the necessary building permit has expired or for which the building permit has been revoked prior to construction shall be eligible to apply for a refund of Development Fees paid on a form provided by the Town for such purposes.
- (ii) Abandonment of Development After Initiation of Construction. An Applicant who has paid a Development Fee for a New Development for which a building permit has been issued and pursuant to which construction has been initiated, but which construction is abandoned prior to completion and issuance of a certificate of occupancy, shall be eligible for a refund if, and only if, the uncompleted building is completely demolished pursuant to a proper demolition permit.
- (iii) Administrative Fee. A five percent (5%) administrative fee, but not to exceed two hundred dollars (\$200), shall be deducted from the amount of any refund granted and shall be retained by the Town in the appropriate Development Fee account to help defray the administrative expenses associated with the processing of a refund application.
- (iv) Refunds shall be made only to the current owner of property on which the New Development was proposed or occurred. If more than one owner owns property which paid the Development Fees, the request for refunds shall contain a copy of the conveyance documents wherein the proportionate ownership shares are set forth and the refunds shall be issued in accordance with the ownership shares of the conveyance documents. Any party obtaining a refund from the Town shall confirm current ownership and entitlement to this refund under oath and shall defend and indemnify the Town from any claims by any other party claiming a right to the refund for the same New Development.

- G. Processing of Applications for a Refund. Applications for a refund shall be made on a form provided by the Town for such purposes and shall include all information required herein, as appropriate. Upon receipt of a complete application for a refund, the Town shall review the

application and documentary evidence submitted by the Applicant as well as such other information and evidence as may be deemed relevant, and make a determination as to whether a refund is due. Refunds by direct payment shall be made following an affirmative determination by the Town.

- H. Applications for refunds due to abandonment of a New Development prior to completion shall be made in or on forms provided by the Town and shall be made no later than sixty (60) days following expiration or revocation of the building permit. The Applicant shall submit (1) evidence that the Applicant is the property owner or the duly designated agent of the property owner, (2) the amount of the Development Fees paid by Public Facilities category and receipts evidencing such payments, and (3) documentation evidencing the expiration or revocation of the building permit or approval of demolition of the structure pursuant to a valid Town-issued demolition permit. Failure to apply for a refund within sixty (60) days following expiration or revocation of the building permit or demolition of the structure shall constitute a waiver of entitlement to a refund. No interest shall be paid by the Town in calculating the amount of any refunds.
- I. The Town may, at its option, make refunds of Development Fees by direct payment, by offsetting such refunds against other Development Fees due for the same category of Public Facilities for New Development on the same property, or by other means subject to agreement with the property owner.
- J. Appeals.
 - A. An appeal from any decision of a Town official pursuant to this Development Fee Code shall be made to the Mayor and Council by filing a written appeal pursuant to the appropriate Town form, if any, with the Town Clerk within thirty (30) days following the decision which is being appealed; provided, however, that if the notice of appeal is accompanied by a cash bond or letter of credit in a form satisfactory to the Town Attorney and the Finance Director in an amount equal to the Development Fee calculated to be due, a building permit may be issued to the New Development. The filing of an appeal shall not stay the imposition or collection of the Development Fee as calculated by the Town unless a cash bond or other sufficient surety has been provided.
 - B. The burden of proof shall be on the appellant to demonstrate that the decision of the Town is erroneous pursuant to the applicable legal standard.
 - C. All appeals shall detail the specific grounds therefor and other relevant information and shall be filed in such form as requested by the Town for such purposes.

Section 9-4-3 Permitting Requirements and Procedures

A. Permit Required

1. The establishment or expansion of mining or quarrying operations may occur in any zoning district if Council approves a Conditional Use Permit. The setback requirements of mining or quarrying operations will be a maximum of 300 feet from the property line. However, Council will regulate the setback requirement on a case-by-case basis determined by, but not limited to, topography and adjacent land uses.
2. For uses applicable to this Article, a complete Use Permit Application must be filed with the Community Development Department. All Use Permits shall be processed in accordance with this Article and Section 601.C of the Planning and Zoning Ordinance.
3. For temporary mining or quarrying operations, as defined herein, a Temporary Use Permit shall be reviewed. Permits must comply with criteria in Subsection B of this section and are processed according to Subsection E of this section. The Council reserves the right to apply reasonable and necessary conditions on permanent and temporary mining operations as they deem the best interest of the public.

B. Procedure for Obtaining Permits

1. Any party that wishes to install or expand a mining, quarrying, or processing operation shall complete a Use Permit or Temporary Use Permit application obtained from the Department. This application shall be filed with the appropriate fees, as established by Council resolution.
2. The Director shall place the application on the next available agenda when a complete application is submitted to the Department. The procedures in Subsection E of this section apply to temporary permits. Appropriate projects shall be noticed, posted, and advertised for

public hearing according to state law and the requirements of the Planning and Zoning Ordinance.

3. Before filing an application, the applicant will meet with the Director or other duly appointed representative of the Town for discussing the intended use(s). The Department will also prepare a list of requested data based on the discussion of the intended use, any preliminary project data provided by the applicant and federal, state and local requirements. This list will assist the applicant in preparing the required application, but in no means, shall be construed as a complete listing of all requirements from all agencies. It is the applicant's responsibility to acquire all necessary permits and licenses. When the application is completed to the Director's satisfaction, it will be submitted, if required to the Commission for review. A recommendation from the Commission will then be submitted to the Council with a request for Council action. The report may include, but is not limited to the following:
 - a. Based on Local Requirements
 - 1) Completed Application - Use Permit/Temporary Use Permit
 - 2) Proposed Location - Impacts to existing residentially developed properties
 - 3) Noise Impacts - Related to noise created by truck traffic, engine warm-up, and operation of mining and processing equipment
 - 4) Dust - Impacts on surrounding land uses
 - 5) Screening - Screening and buffering of operation from properties that are zoned residential
 - 6) Operational Controls - Related to setbacks and environmental impacts
 - 7) Lighting - Planning and Zoning Ordinance
 - 8) Parking - Planning and Zoning Ordinance
 - 9) Post-Mining Plan - A proposed use of the area following the mining project
 - 10) Noise and Vibration Control Plan
 - 11) Other Environmental Impacts - Impacts identified by the applicant or staff
 - 12) Other information as determined by the Director or Council
 - b. Based on Federal, State, County Requirements, and Local Input
 - 1) Transportation - Impacts related to truck traffic routes and associated traffic hazards. ADOT/Local
 - 2) Excavation and Reclamation - Quality and effectiveness of site restoration plan and consideration of site reuse and development timing. FEMA/Local
 - 3) Hydrology Plan - Yavapai County/Army Corps of Engineers
 - 4) Sanitation Permit - Yavapai County
 - 5) EPA Permits - Federal/State
 - 6) DEQ/ADEQ Permits - Federal/State
 - 7) Erosion Plan - FEMA/Army Corps of Engineers/Yavapai County
 - 8) Archeological Permit - State
 - 9) Others, as determined by Federal, State, County or Local requirements.
- C. Application Requirements for Permanent Mining Operations. An application filing for permanent mining, quarrying, and processing operations, as defined in this Article, shall include the following information:
 1. A completed Use Permit Application
 2. A site excavation and reclamation plan containing all required data contained in Subsection D of this Section.

3. A complete list of all required permits from county, state and federal agencies that regulate the proposed use. This list shall include a description of the required permit, including contact person names, phone numbers and addresses, and an anticipated time frame for obtaining each required permit.
- D. Excavation and Reclamation Plan. All Use Permit Applications for mining operations shall include an excavation and reclamation plan, as required by Subsection C of this Section. If the proposed operation is located in a floodplain area, a topographic survey shall be provided in accordance with Yavapai County Flood Control District and/or Army Corps of Engineers requirements. The Excavation and Reclamation Plan shall be reviewed in conjunction with the information gathered by staff. For the purposes of ensuring that the site is reclaimed for reuse and mined in an expeditious manner, the applicant shall provide the following:
1. The general location of resources to be mined overlaid on the topographic survey of the site, if provided.
 2. The method of grading and restoring vegetation.
 3. The location and containment methods for stockpiling of mined materials, including dust and erosion control.
 4. A description of the mining method.
 5. An estimate of the costs associated with the restoration of the site.
 6. The Applicant will provide the Department with sufficient copies of all required documentation for preliminary and secondary review.
- E. Permit Requirements for Temporary Mining Operations
1. Certain temporary mining operations, as defined herein, may not require the same permitting procedures as permanent uses. Only one temporary permit per site may be issued. Successive permits or occasional use of temporary permits are not allowed, and such operations shall be deemed permanent mining operations subject to the permitting requirements provided in this Article.
 2. For temporary mining operations, such as major grading operations where excavated fill is to be sold or other similar types of operations, a permit may be reviewed and approved by the Council without advertising a public hearing when these operations do not exceed a 30-day period. If such operations are to exceed a 30-day time period, but are less than six months in duration, the Commission shall review the Temporary Use Permit and forward a recommendation to Council. Upon filing an application for a temporary mining operation, the operator shall provide the following information:
 - A. The site plan and permit requirements for permanent mining operations stated in Subsection C, paragraphs 2, 3 and 4 of this Section.
 - B. The excavation and restoration information required in Subsection D, paragraphs 2, 3, 4 and 5 of this Section.
 - C. Other information as requested by Council.
- F. Transfer of Use Permit

Use permits for mining, quarrying, extracting and processing operations are not transferable unless, prior to the transfer of the use permit the current holder of the use permit provides the Town of Camp Verde, Community Development Department:

1. Notice of the pending transfer;

2. A copy of a recordable document pursuant to which the person or entity acquiring the use permit agrees to be bound by all terms, conditions and obligations of the use permit; and
3. A copy of the purchase agreement conveying the property that is the subject of the use permit to the person or entity acquiring the use permit.

If the Town of Camp Verde Community Development Department determines that these conditions have been satisfied, the Town of Camp Verde Community Development Department shall notify the person or entity acquiring the use permit that the use permit may be transferred effective the date that the party or entity acquiring the use permit records: (I) the deed conveying the property that is the subject of the use permit to the person or entity acquiring the use permit and (II) the document pursuant to which the person or entity acquiring the use permit agrees to be bound by all terms, conditions and obligations of the use permit.

Section 9-4-4 General Regulations

 - a. Allowing the applicant to provide property as security.
 - b. Allowing a percentage of the monetary gain to be placed in trust as security.
 - c. Other approved methods of assurance.

Section 9-4-5 Administration

- A. Subsequent Review and Expiration of Permits. All Use permits issued pursuant to this Article are subject to periodic review and expiration as determined by Council.
- B. Revocation of Use Permit. Violation of any applicable federal, state, county, or local regulation is sufficient grounds for Council action that may lead to the revocation of the Use Permit.
- C. Appeals. If the applicant or affected property owner disagrees with the decision of the Director to issue or deny a temporary permit or the requirements for permit processing related to a permanent or temporary operation, such person may file a written appeal with the Director within ten (10) days of the Director's decision. Such appeal shall be referred to the Board of Adjustment pursuant to Section 602.B of the Planning and Zoning Ordinance. Further appeals are possible through Superior Court.

Article 10-2

REMOVAL OF TRASH, RUBBISH, AND DEBRIS

Section 10-2-1 Declaration of Nuisance

It is hereby declared to be a public nuisance, fire hazard, and hazard to public health and safety to allow the accumulation of rubbish, trash, filth, debris, abandoned inoperable vehicles, dilapidated buildings and structures, litter, garbage, dead animals, brush, street cleaning, industrial wastes, or other unsanitary matter of any kind on any property, buildings, lots, grounds, tracts of land and the contiguous sidewalks, streets, and alleys. Any such condition determined by the Town to constitute imminent peril to public health, safety or welfare shall be ceased immediately.

1. Disposing of Materials: Trash and garbage must be kept contained prior to off-site disposal so as not to be a nuisance. Additionally:
 - a. Open garbage must not be stored in any residential or commercial lot for more than seven days.
 - b. Commercial dumpsters must be kept clean, emptied regularly, kept in good repair, and continuously covered.
 - c. The Town will notify the property owner of any violations of the above and take enforcement action, if necessary.
2. Fire Hazard: In order to ensure the safety of its residents and protect property, the Town will among other things, enforce fire hazard codes. Additionally:
 - a. The property owner shall be responsible for the removal of dry grasses and weeds exceeding six inches in height AND deemed to constitute a fire hazard by the Fire Marshal or the Zoning Inspector.
 - b. The dispensing, handling, or disposal of fuels, paint thinner, or similar explosive or fire-producing materials shall comply with Underwriters Laboratories, Inc. standards or better.

Section 10-2-2 Notice

Written notice of any violation of **Section 10-2-1** shall be either personally served or sent to the owner, lessee, or occupant of the property at his last known address by registered or certified mail, or the address to which the tax bill for the property was last mailed. If the owner does not reside on such property, a duplicate notice shall also be sent to him at his last known address. The notice shall be dated, signed by the Code Enforcement Officer or Building Official, have attached a copy of this Article, and include, at minimum, the following items: property description/address; description of the violation; required mitigation; and consequences.

The notice of violation and the assessment lien shall run with the land. The Town, in its sole option, may record a notice of violation with the county recorder and thereby cause compliance by any entity thereafter acquiring such property. The nonfiling of any notice of violation shall in no way affect the validity of such notice as to the entities so notified. A satisfaction of a notice of violation or assessment lien shall be filed when the property is brought into compliance by the owner, occupant or lessee.

Where multiple ownership exists of a property in violation of this chapter, the Town may serve any one (1) owner of record and such service shall be deemed to be service upon any party having or claiming an ownership interest in the property. After service upon any one (1) owner, the Town may fully proceed under this chapter the same as if all owners had been served.

Section 10-2-3 Abatement of Nuisances by Town – Assessment of Costs

When any owner, lessee or occupant to whom notice has been given fails, neglects or refuses to abate the prohibited violation from such property by the date set for compliance within the notice, the Town Manager, or his duly authorized representative, shall abate such violation. Upon abatement of the violation, the Town Manager, or his duly authorized representative, shall prepare an assessment containing a verified statement of the actual cost of such removal or abatement. The owner, lessee or occupant shall be required to pay the actual cost, plus an additional twenty (20) percent of such cost, to the Town within thirty (30) calendar days after the assessment has been mailed to the last known address of record of the owner, lessee or occupant. A duplicate copy of such assessments shall be mailed to the person or persons to whom the original notice of removal was mailed in the manner heretofore prescribed for service of the notice of removal. If the total assessment, including the twenty (20) percent additional charge as set out above, is not paid within thirty (30) calendar days after mailing of the assessment, the Town shall apply a lien to the property in the amount of the original assessment, including the twenty (20) percent additional charge, plus the cost of title search, recording fees, legal fees and other related fees. Failure to comply will result in civil court action.

Section 10-2-4 Abatement of Emergency Violations by the Town

- A. When a violation of this code poses a substantial and immediate threat of serious harm to the health or safety of any person, then the Town may immediately enter the property and take the minimum action necessary to relieve the threat of serious harm. Prior to entering the property, the Town shall obtain:
 - 1. The consent of a person who owns, leases, rents, occupies, controls, or has the right to control the property; or
 - 2. A search warrant from the Town Magistrate court authorizing the Town to enter the property.

The court shall issue such an order only upon a showing that probable cause exists to believe that a violation of this code, which poses a substantial and immediate threat of serious harm to the health or safety of any person, exists on the property.

- B. Any person who owns, leases, rents, occupies, controls, or has the right to control the property that is found to be in violation of this Section will be issued a citation for all violations causing the emergency abatement. The Magistrate Court may impose monetary reimbursement orders as justified by the violations.

Section 10-2-5 Lien for Assessment

An assessment shall be forthwith recorded in the office of the County Recorder of Yavapai County, Arizona, and from the date of its recording shall be a lien on such lot, tract of land or premises described in the assessment, until paid. Such liens shall be subject to and inferior to the lien for general taxes and to all prior recorded mortgages and encumbrances of record. A sale of the property to satisfy a lien obtained under the provisions of this Section shall be made upon judgment of foreclosure or order of sale. The Town shall have the right to bring an action to enforce the lien in the Superior Court of Yavapai County, at any time after the recording of the assessment, but failure to enforce the lien by such action shall not affect its validity. The recorded assessment shall be prima facie evidence of the truth of all matters recited

therein, and of the regularity of all proceedings prior to the recording thereof. A prior assessment for the purposes provided in this Section shall not be a bar to a subsequent assessment or assessments for such purposes and any number of liens on the same private premises may be enforced in the same action. All assessment liens filed with the county recorder shall bear interest at the highest rate of interest permitted by law. If the lot is unimproved, permit issuance for any improvements will be denied until such charges are paid in full.

Section 10-2-6 Responsibility upon Transfer of Property

The transfer of any and all property interests in any manner, including, but not limited to, the sale, trade, lease, gift or assignment of any real property against which a Notice of Violation has been issued shall not relieve the party(ies) served unless the legal entity assuming an ownership interest in such property, in writing, assumes responsibility for compliance with the Notice of Violation and a copy of such writing is presented to the Town.

Section 10-2-7 Interference with Enforcement, Abatement

Any person who interferes with, prevents, or attempts to interfere with or prevent an individual employed by the Town or other person contracted by the Town from investigating an alleged violation of this Chapter, or from correcting or abating a violation of this Chapter, is guilty of a Class 1 misdemeanor.

Section 10-2-8 Violations–Penalties

In addition to any cost incurred, any person, firm or corporation found guilty of violating any of the provisions of this Chapter shall be guilty of a Class I misdemeanor punishable pursuant to Arizona State Statutes. Each occurrence or day the violation shall continue shall be a separate offense, punishable as described herein.

Section 10-2-9 Unlawful Dumping (2000-A158)

Definitions.

"Littering," either along a public roadway, on private property of another, or on public property or parks, is the casual release of small amounts of trash, garbage, rubbish, or debris. Littering includes both throwing down of material or failure to clean it up from the property by removing it or putting it in provided trash containers in a manner that will not allow it to be blown or discharged from the receptacle. If littering occurs from a moving vehicle, the driver will be presumed to be the offender.

"Dumping" is the deposit of household garbage or trash, construction materials, industrial waste, soils or rocks, tree or brush trimming, litter, petroleum products, hazardous materials, or injurious materials on or along any public roadway, public property, or property of another.

Violations and Penalties.

Both littering and dumping are declared Class 1 misdemeanors, punishable by fines up to \$2,500 and six (6) months in jail, or to the limits as may be amended by State law. The minimum fine for littering as a first offense shall be \$500, and for dumping, except for dumping hazardous materials, large appliances, industrial waste, automobile parts, or injurious materials, is \$1,000. The fine for a first offense for dumping hazardous materials, large appliances, industrial waste, automobile parts, or injurious materials, or whenever the total quantity of the material dumped, regardless of the type, exceeds ten (10) pounds, is \$1,500. Persons convicted of a second or subsequent offense under this ordinance shall be sentenced to a

fine that is twice the minimum for a first offense, up to a maximum fine for a Class 1 misdemeanor under State law, and shall be ordered to serve not less than three (3) days in jail. In addition to any fines or jail time imposed, the Court shall order that a person convicted of littering or dumping shall be ordered to pick up and remove trash or litter from public property for a minimum of sixteen (16) hours for a first offense and forty (40) hours for a second or subsequent offense, as well as either clean up the litter or dumping caused by the offender, or reimburse the Town or agency which performed the cleanup for the reasonable cost thereof. The Court shall not order personal cleanup if it would create a hardship for the offender because of physical infirmity or age, and shall schedule times and places of cleanup that would minimize interference with the offender's employment or family responsibilities.

Reward. Any person that provides information leading to the citation of another who has violated any provisions of this ordinance shall be paid a \$100 reward as restitution to be assessed in addition to the above penalties upon conviction of the offense.

Posting. Signs shall be posted along major roadways and areas where there has been a history of illegal dumping or littering warning the public of the offense, the minimum fines, and a reward offered for information leading to a citation and conviction.

- E. No person charged with violating this Section shall be convicted and such charge against him or her shall be dismissed if he or she subsequently produces in court the aforesaid written permission.

Section 11-1-5 Noise (2014-A399)

It is hereby declared to be a public nuisance to allow unnecessary, excessive and annoying noises from all sources subject to its police power. At certain levels noises are detrimental to the health and welfare of the citizenry and in the public interests shall be systematically enforced per the following criteria:

A) DEFINITIONS.

The following words, terms and phrases, when used in this Section 11-1-5, shall have the meanings ascribed to them in this Section 11-1-5, except where the context clearly indicates a different meaning:

“A” band level means the total sound level of all noise as measured with a sound level

meter using A-weighting network. The unit is the dB(A).

Ambient noise means the all-encompassing noise associated with a given environment, being usually a composite of sounds from many sources, near and far. For the purpose of this Section 11-1-5, ambient noise level is the level obtained when the noise level is averaged over a period of fifteen (15) minutes without inclusion of noise from isolated identifiable sources, at the location and time of day near that at which a comparison is to be made. Averaging may be done by instrumental analysis in accordance with American National Standard S. 13-1971, or may be done manually as follows:

- 1) Observe a sound level meter for five (5) seconds and record the best estimate of central tendency of the indicator needle, and the highest and lowest indications.
- 2) Repeat the observations as many times as necessary to ensure that observations are made at the beginning and the end of the fifteen (15) minute averaging period and that there are at least as many additional observations as there are decibels between the highest high indication and the lowest low indication.
- 3) Calculate the arithmetical average of the observed central tendency indications.

Decibel means a sound pressure that is twenty (20) times the logarithm to the base 10 of the ratio of the pressure of sound to the reference pressure, 2×10^{-5} Newton/meter².

Emergency work means work made necessary to restore property to a safe condition following a public calamity or work required to protect the health, safety or welfare of persons or property or work by private or public utilities when restoring utility service.

Frequency. “Frequency” of a function periodic in time shall mean the reciprocal of the primitive period. The unit is the hertz and shall be specified.

Impulse noise means a noise of short duration, usually less than one second, with an abrupt onset and rapid decay.

Microbar means a unit of pressure commonly used in acoustics and is equal to one dyne per square centimeter.

Motor vehicles means any self-propelled vehicle operated within the Town, including but not limited to licensed or unlicensed vehicles, automobiles, mini bikes, go-carts and motorcycles.

Period. “Period” of a periodic quantity shall mean the smallest increment of time for which the function repeats itself.

Periodic quantity means oscillating quantity, the values of which recur for equal increments of time.

Pure tone noise means any noise which is distinctly audible as a single pitch (frequency) or set of pitches as determined by the enforcement officer.

Sound level. “Sound level” (noise level), in decibels (dB) is the sound measured with the A weighting and slow response by a sound level meter.

Sound level meter means an instrument including a microphone, an amplifier, an output meter, and frequency weighting networks for the measurement of sound levels which satisfies the pertinent requirements in American Standard Specifications for Sound Level Meters S1.4-1971 or the most recent revision thereof.

B) Violations and Penalties.

ELECTION RESULTS (2009-A364)

Section 15-2-1 Primary Election Option

A candidate is declared elected to office in the Primary Election if that candidate received a majority of all votes cast as set forth in ARS §9-821.01. Each day that violation continues is a separate offense punishable as set forth herein or by civil sanction.

SECTION 17-2-5 Prohibited dumping

It is unlawful for any person to dump industrial waste or the contents of septic tanks into the sewer or wastewater treatment system of the Town. The Town does have a septage dumping station at the Town Wastewater Treatment Plant.

Pursuant to the provisions of the Town code, as amended or as may be amended from time to time, any person found guilty of violating this provision shall be guilty of a class one misdemeanor and, upon conviction thereof, shall be punished by a fine not to exceed two thousand five hundred dollars (\$2,500.00) or by imprisonment for a period not to exceed six months, or by both such fine and imprisonment. Each day that violation continues is a separate offense punishable as set forth herein or by civil sanction.

SECTION 17-2-6 Allowed alternative dump site

It is permissible for industrial waste and the contents of septic tanks to be dumped at a site specially prepared at the landfill operated by Waste Management (Gray Wolf Landfill at 23355 East Highway 169), in accordance with Town procedures.

SECTION 17-2-7 Private sewage disposal systems prohibited exceptions

A. Connection to Town Sewage Required. All wastewater discharge shall be connected with the Town wastewater system, once there is sewer availability, except temporary portable toilets approved by the Town. It is unlawful to construct, operate or maintain any septic tank, privy vault, cesspool, evapotranspiration system or other private sewage disposal facility except as provided in this chapter or as approved by the Town by permit.

B. Availability. For purposes of this section, it shall be presumed that a public sewer is available to the property if the public sewer has available capacity and is within three hundred (300) feet of the property.

C. Unavailability. Where the Town wastewater system is not yet available to a property, a private sewage disposal system may operate as long as:

1. The property owner or user operates and maintains the private sewage disposal system in a sanitary manner and in compliance with all Town, county and state health and environmental regulations and permits.

2. The property owner or use designs, constructs, alters, or maintains the private sewage disposal system in compliance with all Town, county and state standards, regulations, specifications and details, and only after being granted all required permits.

3. The property owner acknowledges that any permit to construct, alter, improve, or operate a private sewage disposal system is only temporary in duration and the property owner agrees to connect to the Town wastewater system once it is available.

D. Prohibition on Permitting. Once there is sewer availability to a property, no permits shall be issued nor shall work be permitted for construction or alteration of any private sewage disposal system on the property unless it is for connection to the Town wastewater system.

SECTION 17-2-8 Notice of sewer availability

The Town shall notify all affected property owners or their agents or lessees, as shown on the last assessment of the property, that the Town wastewater system is available and that property owners must connect within twenty-four (24) months. Such notice shall be given by certified mail to the property owner or agent or lessee, and by publishing the same notice, together with a description of the affected parcels, in not less than two issues of a newspaper of general circulation within the Town. The times prescribed in this section shall run from the date of the latest published notice. The notice shall thereafter be recorded and be deemed to run with the land.

SECTION 17-2-9 Mandatory connection to Town wastewater system once available

A. Time to Connect After Notice. Within twenty-four (24) months from the date that the director provides notice of sewer availability, as defined in this code, a real property owner with building or water fixtures thereon shall consent to direct connection to the Town wastewater system in accordance with the Town design requirements, the adopted Uniform Plumbing Code, as amended, and all applicable state, county, and Town regulations. If within twenty-four (24) months of notice the property owner notifies the Town in writing of the owner's consent to connect, the Town shall make connection at no cost to the property owner. If the property owner refuses to consent within the time period stated above, the owner is still required to connect at the owner's cost at the time of failure. The Town reserves the right to refuse connection at Town cost if the circumstances with the property and private sewage system are such that connection would be an unreasonable cost to the Town as determined by the Town engineer. If such a determination is made, then Town wastewater service is deemed to not be available, and the private sewage system may remain. Total cost of replacement will then be borne by the property owner. Under circumstances of Town refusal, the Town may elect to provide a degree of assistance towards connection cost if the property owner determines to make connection. Such assistance will be based upon criteria or formula not inconsistent with the nature and amount of resources expended for other connections made by the Town in the immediate vicinity.

B. Non-Connection Availability Charge. Immediately following the notice described in Section 17-2-8 of this chapter, the Town shall assess each property owner a monthly availability charge which shall be equal to the current monthly sewer charge for the property in question. If a property owner consents to connect to the Town wastewater system thereafter, the Town shall stop assessing the monthly availability charge upon receipt of such consent. If consent is later withdrawn, the monthly availability charge will be assessed to the utility account from the date of consent and will be due and payable in the same manner as any other utility charge. The Town may employ the procedures set forth in this code or other applicable provisions of law for collection of such availability charge if not paid when due and payable. Once

connection takes place, the Town shall record the fact of connection and all authorized fees and rates are applicable.

C. Abandonment of Septic. Upon connection to the Town wastewater system, any septic or alternate disposal system shall be pumped and abandoned and either removed or filled as stated in subsection A of this section or at the owner's expense, in accordance with the adopted Uniform Plumbing Code, as may be amended from time to time, and all local and state laws, rules and regulations.

D. Public Nuisance. Failure to abandon a septic or other alternate disposal system in accordance with this code shall constitute a public nuisance. Pursuant to the provisions of the Town code, as amended or as may be amended from time to time, any person found guilty of violating this provision shall be guilty of a class one misdemeanor and, upon conviction thereof, shall be punished by a fine not to exceed two thousand five hundred dollars (\$2,500.00) or by imprisonment for a period not to exceed six months, or by both such fine and imprisonment. Each day that violation continues is a separate offense punishable as set forth herein or by civil sanction.

SECTION 17-2-10 Permits for service connections

Before physical connection is made to the Town wastewater system, a permit must be secured from and forty-eight (48) hours' notice given to the Town. Sewer connection permits shall run with the land and shall not be transferable from one parcel to another parcel or from property to property. All such connections shall be made and all such work, including any sewer connection permit fee, shall be done at the expense of the applicant unless voluntary connection is made pursuant to Section 17-2-9(A). All connections shall be made under the supervision of the Town, and no such connection shall be covered until the work been inspected and approved by the Town.

Article 17-3 MUNICIPAL WATER SYSTEM

Section 17-3-1 Designation of municipal water systems

The waterworks plant and system, including the necessary lands, rights-of-way and easements now owned by the Town, both within and without the corporate limits of the Town, together with all replacements, improvements, betterments, extensions, and additions thereto, hereafter constructed or acquired, shall be designated by name as the Camp Verde municipal water system.

SECTION 17-3-2 Installation charges

Installation charges shall be fixed by resolution of the Town council consistent with the provisions of this section.

A. The costs to applicants for service connections as provided in this section shall, in each case, be determined by price lists, open to the public, setting forth the unit prices for the respective materials and labor and conforming to the prevailing prices then locally current for such materials and labor.

B. The cost of repairing or replacing any pavement or other structure necessarily damaged in the process or because of the installation of any service connection, either within or without the corporate limits of the Town, shall be paid by the person making application for such service, in addition to any other charges that may be required for such service.

C. The total cost of the installation and all costs incidental thereto for any private fire protection service shall be paid by the person making application for such service. Any service connection installed for

private fire protection shall be used solely for such service and no other. The agreement incorporated in the application for such service shall contain the foregoing provision.

D. All such service connections may require cross-connection control valves as specified by the state department of health services, these valves shall be installed at the property line and the valves shall be tested by a certified tester. In addition, service connections may require pressure-reducing valves. The need for these valves will be determined by Town staff. The required valves shall be paid by the person making application for such service.

SECTION 17-3-3 Water main service requirements

Appropriate size mains must abut property requesting service before service can be installed. The property requesting service shall be a minimum of fifty (50) feet abutting the main. Town staff will determine appropriate size mains according to Town standards and Arizona Department of Health Services regulations.

SECTION 17-3-4 Water service connection charges

A water connection fee established by resolution shall be collected for each new service connected to an existing distribution main serving any premises, and shall be payable at the time application is made for the service; provided, however, that in those cases where the premises to be connected has either as a part of the price of the premises or as a part of an improvement district assessment, paid the amount established by resolution or more for the water distribution system serving such premises, and such water distribution system becomes a part of the Camp Verde municipal water system, then the service connection fee shall not be charged. If the amount so paid by the premises is less than the amount established by council resolution, then the connection fee shall be the difference between the amount so paid and the amount established by council resolution. If there is a dispute as to the amount so paid, the utilities director shall determine the amount of credit to be allowed. In addition to the above connection fee, each customer shall be charged an installation fee, in accordance with a schedule of such charges for the respective sizes and classes of service connections as established by resolution.

SECTION 17-3-5 Restriction and termination

All water service to any premises, except for domestic and residential use, shall be furnished only upon the express condition that such service may be restricted as to use at any time or discontinued after thirty (30) days' written notice by the water system, when and if the water supply is considered inadequate to furnish such service, or when other cause is deemed sufficient by the Town.

SECTION 17-3-6 Fire regulations

When an alarm of fire is given, every person whose premises are supplied with water by the water system shall immediately close all hydrants, faucets, taps or appliances through which water is then being used, except those necessary for the essential domestic purposes, and shall not open or use water from the same during the continuance of such fire.

SECTION 17-3-7 Declaration of water conservation policy

The purpose and intent are to conserve the available water supply and protect the integrity of the Town water supply facilities, with particular regard for domestic water use, sanitation, and fire protection. To protect, preserve public health, welfare, and safety. Identify water supply needs and recommend water management and conservation practices to extend current water supplies during short- and long-term

emergency situations. To minimize the adverse impacts of water supply shortage or other water supply emergency conditions. Water uses, regulated, or prohibited, under this policy are considered to be non-essential and continuation of such uses during times of water shortage or other emergency water supply condition are deemed to constitute a waste of water which subjects the offender(s) to penalties pursuant to Section 17-3-14.

SECTION 17-3-8 Water conservation compliance

It shall be unlawful for any customer of the Town water department to knowingly make, cause, use, or permit the use of water from the Town for residential, commercial, industrial, agricultural, or any other purpose in a manner contrary to the provisions of this chapter. The provisions of this policy shall apply to all persons, customers, and property utilizing water provided by the Town. The terms, "person" and "customer" as used in the policy include individuals, corporations, partnerships, associations, governments, and other legal entities.

SECTION 17-3-9 Authorization

The Town council upon the recommendation of the utilities director is hereby authorized to declare, or rescind, or implement the applicable provisions of this policy upon determination that such implementation is necessary to protect public health, safety, and welfare.

SECTION 17-3-10 Public Notice

The Town will publish an appropriate demand stage alert following action by the Town council. Posting will be provided in the local newspaper, on the Town's website, the Town hall, and the Town library. Public outreach to public schools, civic groups, and other adult and child groups will be provided. Business services shall distribute conservation notices in water bill mailing and provide them to the general public at the utility's customer service office.

SECTION 17-3-12 Initiation and termination of drought response stages

The Town council upon the recommendation of the utility's director is hereby authorized to declare or rescind the demand stage alert levels in conformity with and based upon the delivery capacity triggers set forth herein below which assess the relationship between demand and municipal safe production capability. Safe production capability is seventy-five (75) percent of the total available water resources, based upon distribution components, storage reserves, weather conditions and historic data. NOTE: The safe production capability may change with summer and winter seasons because of the static water levels in Town wells.

A. **Monitoring.** All relevant components of the Town water system will be monitored to ensure timely response to water situations including water supply, treatment and distribution system trends and potential constraints. Should trends show that any system is approaching trigger levels, more detailed monitoring will be implemented. At a minimum, during non-critical water supply periods, monitoring and trending will take place monthly. During critical water supply periods the monitoring and trending will take place at least weekly and may be monitored even more frequently.

B. **Initiation of Drought Response.** When delivery capacity trigger conditions occur, the utilities director shall request the appropriate stage alert level. Meeting or exceeding one (1) or more trigger conditions will be sufficient cause to initiate a corresponding level. Notification of the public will occur.

C. **Termination of Drought Response.** When an emergency no longer exists, termination of drought measures will be announced through the media and newspapers.

SECTION 17-3-13 Delivery capacity

The following demand alert stages are hereby prescribed:

A. Delivery Capacity Triggers.

1. **Stage 1 Excessive Demand Alert.** When production is operated at or above seventy-five (75) percent of available production capacity for five (5) consecutive days.

NOTE: Available production capacity may change with summer and winter seasons.

2. **Stage 2 Water Watch.** When demand is greater than safe production capability for three (3) consecutive days.

3. **Stage 3 Water Warning.** When demand is greater than safe production capability for two (2) consecutive weeks.

4. **Stage 4 Water Emergency.** When water demand exceeds total production capability. A Stage 4 Water Emergency shall require the enactment of additional water use restrictions. These restrictions shall be determined by the Town council in an amount necessary to reduce water demand to a safe level. An emergency may be declared in this instance at the discretion of the Town council.

B. Alert Levels.

The following stage alert levels shall govern the use of water by customers of the Town water department as prescribed below:

1. ***Stage 1:*** Five (5) percent reduction in anticipated water use
2. ***Stage 2:*** Ten (10) percent reduction in anticipated water use.
3. ***Stage 3:*** Thirty (30) percent reduction in anticipated water use.
4. ***Stage 4:*** Fifty (50) percent reduction in anticipated water use.

The Town council may, from time to time, change the established water reduction level(s) or enact additional water conservation or water use reduction measures as may be necessary or appropriate to achieve a desired reduction in water use.

C. Stages.

1. **Stage 1: Excessive Demand Alert.** Water users are specifically encouraged to minimize waste in water used for irrigation, vehicle and pavement washing, construction and other water consuming activities. No person shall wash paved areas such as drives, sidewalks, tennis courts, or basketball courts. Outside watering shall be prohibited between 10:00 a.m. and 6:00 p.m. Outside watering limited to two (2) hours on designated allowed watering days (see table):

- f. Use potable water in violation of any other restriction deemed necessary by the Town council for the purpose of protecting the welfare of the citizens of the Town.

Depending on the severity of the Stage 4 Water Emergency, the Town council may suspend new water connections.

SECTION 17-3-14 Enforcement of drought restrictions

A. The customer shall be responsible for complying with these drought restrictions. Those who violate any of these stages of alert will be subject to the penalties in this provision.

B. The customer must pay the water bill, including the charge imposed under this section by the due date of the water bill. If the customer chooses to appeal the penalty and the appeal is approved, the disputed charge will be credited on the customer's next water bill. Customers will be notified of any penalties/violations through the regular utility bill mailing process.

In addition, the Town water department may install a flow restrictor on the service line that will remain in place during the irrigation season, April 1st through September 30th, or may suspend service temporarily until the cause of the violation is corrected and all outstanding penalty and water service charges have been paid.

SECTION 17-3-15 Appeal process

A. Any customer subject to a charge for violation of a provision of this chapter may appeal the charge by filing a written notice of appeal to the Utilities Director, within ten (10) days of the violation notice.

B. The Utilities Director must respond to the appealing customer within ten (10) business days of receipt of an appeal, or the charge will be removed from the account. Notwithstanding the foregoing, if additional research into the account is necessary to assess the grounds of appeal, the Utilities Director may extend this time in his or her discretion as reasonably necessary to obtain accurate information to render the decision. The customer shall be notified of any extended review periods and the decision of the Utilities Director when rendered.

C. If the Utilities Director denies the appeal, the appealing customer may submit the appeal in writing to the Town Manager within ten (10) business days of the date of the denial by the Utilities Director. The appeal shall be informal and the decision by the Town Manager will be final.

ARTICLE 17-4 Capacity Fee Payment Procedures

SECTION 17-4-1 Purpose

This chapter is adopted for the purpose of implementing a method of cost recovery to provide a source of funding for the Town's continued capital investment in the water and wastewater systems and to promote the health, safety and general welfare of the residents and non-residents of the Town. The Council shall, by resolution establish capacity fees to be charged by the Town for connections to the Town water or sewer system.

SECTION 17-4-2 Payment required

All residential and nonresidential customers seeking connection to the Town water or wastewater system shall pay to the Town the current effective capacity fee based on the meter classification. Such payment shall be made as a condition to the activation of service connection.

SECTION 17-4-3 Calculation methodologies used to calculate capacity fees

- A. Cost recovery (past) is used in instances when a community has oversized a facility or asset in anticipation of future development. This methodology is based on the rationale that new development is repaying the community for its share of the remaining unused capacity fee.
- B. Incremental expansion method (present) documents the current level of service for each type of public facility. The intent is to use revenue collected to expand or provide additional facilities, as needed to accommodate new development, based on the current cost to provide capital improvements.
- C. Plan-based method (future) utilizes a community's capital improvement plan and/or other adopted plans or engineering studies to guide capital improvements needed to serve customers.

SECTION 17-4-4 Deposit of capacity fees for water and wastewater utility services

All moneys received from the water or wastewater capacity fees shall be deposited into separate utility revenue funds to be used for capital expansion, enlargement and improvement of the Town's water and wastewater system and/or for the retirement of debt service, both principal and interest, related to water and wastewater system capital outlay to serve customers.

SECTION 17-4-5 Review of fees

The council shall, by resolution, establish water and wastewater capacity fees and update capacity fees periodically.

ARTICLE 17-5 Utility Extension Rules

SECTION 17-5-1 General rules and regulations applicable to all classes of service.

A. Application for Services.

1. ***New Service Customers.*** New service customers, located in an area where existing primary lines, mains or sewers abut property and require only construction of services and assuming responsibility for service to a new structure or place which has not had utility service, before a

minor change in size of service shall make application during normal business hours at the utility office in 395 S. Main Street, Camp Verde, Arizona 86322.. Customer shall furnish name, billing address, assurance of payment, data on size of service, requested location, legal address of premises, lot and block location, and contemplated construction target date.

2. Other New Service Customers. New service customers located in an area where primary lines, mains or sewers do not now exist or require reconstruction of existing facilities shall make application as specified in subsection (A)(1) of this section. Customers in this class and subdividers requiring utility line extensions must follow procedures as set forth hereafter for each utility.

B. Easement. A customer, owner and/or subdivider must furnish adequate mutually agreed easements or right-of-way for installation and maintenance of utility lines.

C. Construction on Customer's Premises. All construction on customer's premises must be under permit as issued by the building inspector and must be in compliance with all said jurisdictional building codes. Prior to actual service hookup all of the customer's work must be approved and certified in compliance by jurisdictional inspector before a utility service hookup or turn—on is authorized.

D. Conditions for Providing Service to New Customers. The utility will not connect any new customers on a new line until said lines are completed and accepted by the Town. The utility will not accept new customers on an existing line if said lines do not have sufficient reserve capacity to accommodate said customers' estimated usage. The utility will not provide service to new customers to any lot or tract unless the following conditions are met:

1. Before service is supplied, the new tract or lot must meet subdivision requirements of the Town or county (whichever has jurisdiction) as to dedication of public rights-of-way and provisions for construction of public improvements including water, sewer, drainage, streets, gas, and electric.
2. A certificate by county or Town must be issued and a copy furnished to the utility certifying that all conditions of subdivision, regulations and public improvements have been met.
3. All mains must abut property for which service is applied.
4. Service lines from meter to building are not to exceed one hundred (100) feet and must be of adequate size as per Uniform Plumbing Code.

E. Zoning Changes. Any new customer (after date of these rules and regulations) who applies for service which requires a premises to have larger service as a result of a change of use granted by a zoning change or special use permit, and which results in the requirement of a larger line, main or pipe, shall be obligated to pay for the reconstruction or upgrading of the utility system. Section 17-5-2 Extensions, construction, and reconstruction of potable water lines.

SECTION 17-5-2 Extensions, construction, and reconstruction of potable water lines

A. The following definitions are made for the purpose of this policy section:

Customer. A customer taking service at a given location shall be counted as a single customer even though he or she may be taking service at that location through more than one meter or under more than one rate schedule.

Distribution mains means the street or alley mains required to service customers with domestic and fire service.

Feeder mains means intermediate-sized mains located in grid on approximate quarter section lines and also one-sixteenth section lines in nonresidential areas.

Trunk Mains. Trunk mains consist of that portion of the water system which consists of large pipes serving as a supply main or feeder main and further defined as:

1. **Supply mains:** The pipes carrying the water supply from Mongini Well Fields to the Town of Camp Verde, and rural distribution mains;
2. **Arterial mains:** Large mains forming a loop around the Town of Camp Verde and mains on approximate section lines forming the major grid system.

Water Services means the service pipes from a water main to the customer's meter.

B. Service Areas.

1. The Town's water system services a portion of the Town, a significant portion of the Yavapai Apache Nation and a small area within Unincorporated Yavapai County. Other private water companies within the Town include Verde Lakes Water Corporation and Cactus State Utility Operation Company. The Town system is a gravity system made up of 7 different pressure zones with pressure reducing valves.

C. Design Criteria. The following basic design criteria shall be used for design of all new construction. All water mains shall be designed in accordance with criteria per latest edition of the rules and regulations as promulgated by the Arizona State Board of Health and Department of Health "Minimum Requirements, for Design and Construction of Water Distribution Systems." In addition, the design shall conform to the latest A.W.W.A. Standards along with the requirements of the Town of Camp Verde standard specifications and shall be approved by the Town engineer of the Town of Camp Verde. In addition, the following basic criteria shall be met:

1. Town of Camp Verde: All water mains within the Town of Camp Verde and all areas which, within a reasonably foreseeable future, could or would become part of the Towns by annexation, shall be designed as follows:

a. Fire Flow. The insurance service office has established fire flow standards for various types of construction, density, and use. All mains shall be designed to meet these standards plus twenty (20) percent capacity allowance for future zoning or use changes.

Fire flow requirements shall be met with a minimum residual pressure of twenty (20) pounds per square inch after deducting a normal peak two-hour customer usage. The design engineer shall submit data on the design criteria and fire flow calculations to the Town engineer for approval. For purpose of peak usage flow in residential districts, the peak two-hour flow shall not be less than four times the calculated wintertime peak two-hour domestic flow. Diversity demand flow data has been calculated for residential users and is available at the Town engineer's office.

b. Main Sizes Minimum. In general, as a guideline all main sizes must meet flow demands and insure adequate domestic service. Grid system in general shall be as follows:

- i. All mains located on section lines or approximate section lines shall be at least twelve (12) inches in diameter.
- ii. All mains located on quarter or mid-section or approximate lines shall be at least eight inches in diameter for single-family residential districts and at least ten inches in diameter for high density residential and all commercial districts.
- iii. In commercial and high-density residential areas, mains located on the one-sixteenth section line or approximate thereof shall not be less than eight inches in diameter.
- iv. All other internal distribution mains shall be at least six inches in diameter except that smaller mains serving dead-end cul-de-sacs or short laterals may be approved by the Town engineer provided that total service requirements are satisfied. No fire hydrant shall be connected to a main which is less than six inches in diameter.
- v. Fire hydrants shall be set every four hundred (400) feet or closer as determined by the fire marshal.

2. Rural Areas. Design criteria for rural areas shall be as follows:

- a. A subdivision or project desiring or requiring fire hydrant service must meet the same design criteria as set forth for Town of Camp Verde as specified above.
- b. A subdivision, project, or area desiring only water for domestic purposes shall meet the following standards:
 - i. All mains shall be constructed to a standard to provide the peak two-hour flow plus twenty (20) percent to allow for change in use. Mains shall be sized so that the delivered pressure at the customer meter will never be below twenty-five (25) pounds per square inch. The design engineer shall submit design criteria and flow calculations to the Town engineer for approval.
 - ii. Owners of property desiring use or extensions of lines under this paragraph will be required to enter into a written contract or agreement setting forth the right to service and conditions of service thereof. Said agreement shall be recorded and drawn in form to run with the land as an encumbrance or restriction.

D. Extension Limitations. Approval of all main extensions to serve new areas is limited to the availability of water to the water system. The following guidelines will be as follows:

- 1. No new area service will be authorized if the usage in the area will exceed the reserve capacity of the water system.
- 2. The reserve capacity of the water system will first be allocated to the undeveloped areas within the corporate limits of the Town of Camp Verde.
- 3. If the water requirements of the Town of Camp Verde are satisfied and there is water available over and above the requirements of existing rural areas now served, then the Town staff will consider extensions and new service hookups to the rural system.

4. Existing Rural Mains. No new hookups to existing lines will be allowed unless said lines meet full design criteria as set forth in subsection C of this section for said lines.
5. Extension of Mains. Any and all mains will not be extended unless the extension with the inclusion of the tributary existing mains meet full design loading criteria set forth in subsection C of this section.
6. All requests for main extensions must be accompanied by applicant's preliminary plans drawn under the direct supervision of an Arizona registered engineer pursuant to Arizona Revised Statutes 32-142. Town staff may require forty-five (45) days to examine any main extension request.

E. Special Conditions—Extensions. Due to the fact that elevation affects water service, certain restrictions, and conditions in addition to the above are necessary as follows:

1. Subdividers or developers desiring to install water service into a second- or third-stage service area as outlined in subsection B of this section shall install as part of the development cost the necessary booster pump, storage and other devices to service said area. A contractual agreement with the Town of Camp Verde must be made setting forth the conditions, performance limitations, etc. for said water service. Said agreement shall be recorded and drawn in form to run with the land concerned as an encumbrance or restriction.
2. No new customer services or extension will be hooked up in a second- or third-stage service area where mains now exist unless the customer signs a limited-service agreement waiving any liability on the part of the utility for pressure, or quantity of water delivered, and unless there exists a reserve capacity in the mains available for limited service without jeopardizing demands of existing customers.

F. Financing Lines or Mains. Main extensions are the responsibility of the subdivider, or the users involved and may be paid for by one or more of the following:

1. Subdividers and/or owners contracting or installing the improvements and furnishing same to the Town of Camp Verde;
2. Special improvement district formed as per state of Arizona Laws for Town or county special improvement districts (with any Town approvals required granted in the Town's discretion);
3. Contractual agreement with the Town of Camp Verde setting forth conditions of payment and construction.

G. Water Service. Customer water service shall be constructed to meet Town of Camp Verde standard specifications. That portion of service line on customer's premises on customer side of the meter is the customer's responsibility. The customer must pay for the water service and appurtenances including meter under one of the following conditions:

1. New Mains and Mains in New Areas. The subdivider or owner at the time of construction of water mains shall construct all service in accordance with locations as shown on the approved drawings.
2. Existing Mains. The Camp Verde municipal utilities, upon payment of costs in advance, will tap main and run the water service to the meter. Customer must provide space on his or her

property within three feet of property line nearest to main for installation of meter and meter box. The Camp Verde municipal utilities may allow an approved licensed contractor to tap main and run service line. Permit and drawings must be approved in advance by Camp Verde municipal utilities.

H. Temporary Facilities. Temporary customers or others using temporary facilities shall pay for all temporary facilities installed and be credited for salvaged materials removed.

SECTION 17-5-3 Extensions, construction, and reconstruction of sanitary sewer

A. The following definitions are made for the purpose of this policy section:

Customer. A customer using sanitary sewer service at a given location shall be counted as a single customer even though he or she may be using sewer at that location for more than one building or facility.

Trunk Sewer. Trunk sewer consists of a large sewer pipe normally larger than eight inches in diameter that receives or is capable of receiving sanitary wastes from more than one tributary branch or lateral sewer.

Lateral Sewer. A lateral sewer consists of the sewer pipe and appurtenances serving a customer in a subdivision or from street and alley and emptying into a trunk sewer.

Sanitary Sewer Service. Sewer service consists of that pipe from customer's premises to the lateral sewer.

B. Service Area. The service areas are divided into three basic geographic areas as follows:

1. First stage: That area presently now being served by gravity fall and potential area within Town of Camp Verde which can be serviced by a gravity fall sewer;
2. Second stage: That area now being served by a lift station and potential area which can be served by a lift station, raising sanitary wastes into the first stage system;
3. Third stage: That area and potential area which can be served by a lift station raising sanitary wastes into the second stage system.

C. Design Criteria. The following basic design criteria shall be used for all new construction. All sanitary sewer mains shall be designed in accordance with criteria as per latest edition of the rules and regulations as promulgated by the Arizona Board of Health and the Department of Health "Minimum Requirements for Design and Construction of Sanitary Sewers." In addition, the design shall be approved by the Town engineer of the Town of Camp Verde and the following basic design criteria shall be met:

1. In commercial and industrial areas, the design engineer shall submit flow calculations to the Town engineer for approval prior to completing design of sewer;
2. In all areas the design engineer must submit to the Town engineer for approval, calculations of potential flow from area to be served as well as flow from future areas to be served.

D. Extension Limitations. Approval of all sewer extensions to serve new areas is limited to the availability of capacity in the connecting system. The following guidelines will be followed:

1. New area service will be authorized if the usage in the area will exceed the reserve capacity of the sanitary wastewater disposal system.

2. The reserve capacity of the sanitary wastewater system will first be allocated to the vacant areas now having access to a lateral sewer who have paid for their share of said lateral sanitary sewer.
3. The reserve capacity of a trunk sewer will first be allocated to the district which participated by an assessment levy or payment of costs.
4. A new area to be developed will only be allowed to connect lateral mains and hookup services to the extent that the reserve capacity of the connecting sewer is sufficient to handle the flow.
5. All requests for main extension must be accompanied by applicant's preliminary plans drawn by an Arizona registered engineer.
6. Town staff may require forty-five (45) days to examine any main extension request.

E. Special Condition Extensions. Due to the fact that certain areas require lift stations, conditions, and limitations in addition to the above are necessary as follows:

1. Subdividers, developers, or owners desiring to install sanitary sewer service into a second- or third stage serve area as outlined in subsection C of this section shall install as part of the development cost the necessary lift pump, lift station and devices to service said area.
2. Subdividers, developers, or owners desiring to install sanitary sewer service in an area where the discharge is into an abutting subdivision sewer whose reserve capacity is not sufficient shall install, as part of the development cost, the necessary trunk connection to a location where the reserve capacity does exist.

F. Financing Mains and Appurtenances. Trunk and lateral mains and appurtenances are the responsibility of the subdivider and/or owners and users involved and may be paid for by one or more of the following:

1. Subdividers and/or owners contracting or installing the improvements and furnishing same to the Town;
2. Special improvement district formed as per state of Arizona laws for Town special improvement districts (with any Town approvals required granted in the Town's discretion);
3. Contractual agreement with the Town of Camp Verde setting forth conditions of payment and construction.

G. Sanitary Sewer Service. The customer sewer from his or her premises to the lateral sanitary sewer is the responsibility of the customer and/or owners both for construction and maintenance. All construction shall meet the Town of Camp Verde building codes, plumbing division. The customer must apply for a permit and be granted same prior to construction.

H. Temporary Facilities. Temporary customers or others using temporary facilities shall pay for all temporary facilities installed and be credited for salvage materials and removed.
